- ✓ New Schlüter®-WASHBASINPROFILE triangular profiles

Complete set for individually designed vanities: Schlüter®-KERDI-BOARD-W

The bathroom is far more than just a location for a shower, toilet and washbasin. It is a sanctuary, a personal space for relaxation and rejuvenation. Unsurprisingly, designing such a wellness oasis is of great importance today. The vanity unit is a special eye-catcher in the bathroom. Whether floating or supported, in a niche or wall corner or prominently placed in the space, all variants can be created precisely according to your preferences with Schlüter-KERDI-BOARD-W.

The set can be individually cut to size and tiled to specifications. It includes all the components you need for building: the KERDI-BOARD element, matching prefabricated components, a drain adapter with a connection thread for commercially available traps and a cartridge of the KERDI-FIX sealing adhesive. The drain adapter features a permanently integrated elasticated KERDI waterproofing collar that guarantees secure connection.

The KERDI-LINE-VARIO drainage profiles to match the covering of the vanity unit and the components for the wall fixed unit can be ordered separately.

Set includes:

- prefabricated vanity unit made of KERDI-BOARD
- KERDI-KERS corner pieces (right and left)
- drain adapter with 1¼" connection thread, including KERDI waterproofing collar
- cartridge of KERDI-FIX

Making design ideas a reality – with Schlüter®-KERDI-BOARD-WW

Our daily routine typically begins and ends in the bathroom. A pleasant atmosphere with harmonious design is the best way to start and end the day. Now you can easily and securely integrate KERDI-BOARD-WW in conjunction with a wall fitted mixer tap into bathroom designs with uniform tile covering.

The unique bathroom appearance can be further enhanced with additional KERDI-BOARD elements such as shelves or partition walls. Floating vanity design can help reduce access barriers in the bathroom.

More design choices for bathrooms – with Schlüter®-KERDI-BOARD-WS

Are bathrooms just a functional space for going through a morning-routine? Absolutely not! Design, lifestyle adaptations and individuality are equally important criteria. From major elements to minute details. In addition, not every vanity fitting is the same – there are different versions to match every taste.

KERDI-BOARD-WS is the perfect solution for greater design variety in a personal wellness area. The complete set including a permanently integrated reinforcement plate enables the easy assembly of a vanity fitted monobloc mixer tap, while leveraging all advantages of KERDI-BOARD-W for simple construction.

A sturdy assembly

Whether classic style, colourful or with minimalist tiling – the different installation variants of KERDI-BOARD-W support virtually any style preference. By the way, support stands made of KERDI-BOARD create an especially sturdy structure for optimum durability. The drawings and images shown here offer a few design ideas

Schlüter®-KERDI-BOARD-WS

Ideal for new construction and renovation

Are you looking for a beautifully upgraded vanity area instead of a newly tiled bathroom? KERDI-BOARD-WS creates true added value for renovating existing bathrooms – both in terms of visual appeal and functionality.

Plan for the future – today

A typical bathroom has a life expectancy of 20 years or more. A lot can happen in that time. Your family may grow, relatives in need of nursing care may live with you or you may experience physical handicaps of your own due to age, illness or injuries. It's best to anticipate these needs with a bathroom that meets the requirements of all generations.

Accessible vanities are an important component of such a bathroom. KERDI-BOARD-WS in conjunction with a vanity fitted monobloc tap as well as our optionally available wall fixed vanity units create a completely free-floating solution for barrier-free bathrooms with ample space for wheelchair use underneath.

Intelligent drainage with style

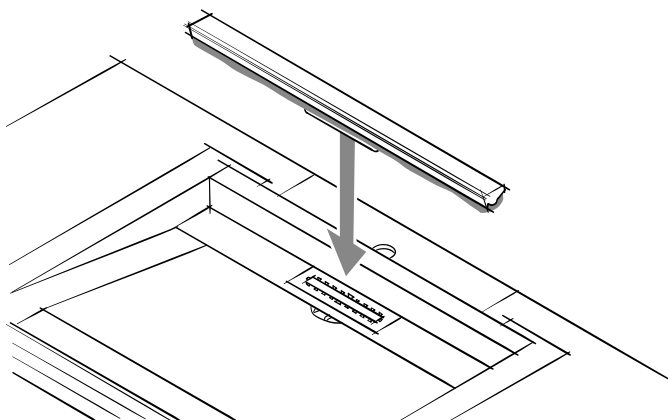

Schlüter®-KERDI-BOARD-WDP

Schlüter-KERDI-BOARD-WDP is a drainage profile that is integrated into the KERDI-BOARD-WS vanity unit as a shadow gap. It is made of brushed stainless steel V4A. A 140 mm drain opening allows water to flow into the drain. The drainage profile is individually customisable and comes with two additional end caps.
