Schlüter®-KERDI 200

Seamless waterproofing with roll widths up to 200 cm

Schlüter Systems®

Schlüter®-KERDI 200 – Simple. Reliable. Quick.

Advantages for you

Schlüter-KERDI is a standard-compliant waterproofing membrane that is integrated into the tile assembly. It successfully passed European Technical Assessment (ETA) and features various general building authority test certificates (abPs). In addition to our standard roll width of one metre, roll widths of 150 and 200 cm offer particularly fast installation options in many situations where installers can create a continuous waterproofing assembly without joints. All roll widths are now available in packages sufficient for 30 m² for easier handling.

KERDI 200 can be cut with great precision and ease due to the convenient imprinted gridlines. The complete system for dependable waterproofing also includes matching seaming bands, corner pieces and pipe collars. The sealing adhesive Schlüter-KERDI-COLL-L for abutting joints and connections completes the waterproofing system from a single source. While the floor drains Schlüter-KERDI-DRAIN or Schlüter-KERDI-LINE provide drainage, the Schlüter-KERDI-SHOWER system is designed to provide sloped shower trays – these installation elements are abP-certified as well.

- ✓ The dependable and quick waterproofing solution
- ✓ Proven for over 30 years
- ✓ Three different widths
- ✓ The right width for every application
- ✓ Large widths save time and money
- ✓ Three widths – one weight – easy handling
- ✓ Complete accessory assortment for reliable results of a system (Schlüter-KERDI-KEBA, KERDI-KERECK, -KERDI-COLL-L)
- ✓ Standard-compliant waterproofing system
- ✓ With abPs and ETA
