Illustrated Price List

Effective October 1, 2025

USA

Dear Tile Professional,

Constant development of innovative solutions for ceramic tile and natural stone installations is the cornerstone of our tradition at Schluter. The Illustrated Price List, which you hold in your hands, features new and improved products that reflect that tradition.

A perfect example is Schluter®-SCHIENE, which became the foundation of Schluter's success in 1975. In our tradition of innovation, the simple right-angle profile has since evolved to include an integrated joint spacer. Often, small details result in large advantages for the installer. In this case, the integrated joint spacer makes tile setting easier and cleaner. Gradually, all of our products will be equipped with this feature.

To a large degree, Schluter-Systems owes its position as market leader to you, our industry partner. Your input has helped us improve on the function, aesthetic appeal, and safety of our products. Hence, we will keep our ear to the market, so that we may continue to deliver high quality, professional products to specifiers and architects, distributors and dealers, contractors and owners.

Sincerely,

A handwritten signature in black ink, appearing to read 'W. Schlüter', written in a cursive style.

Werner Schlüter

1975 - 1981

MANUFACTURING

The majority of Schluter® products sold in North America are also produced here.

In addition, products produced in North America are shipped overseas for worldwide distribution.

International cooperation in product development and support of the local economies are vital elements of our core strategy.

Schluter® Profiles

Transition & edge-protection profiles for floors

Transitions from a tiled floor to other surfaces need to be protected, and floor profiles are designed to ensure a smooth transition, while preventing tile edges from chipping and cracking. Schluter Systems offers a vast selection of floor profiles that protect tile edges between floor coverings at both equal and lower elevations.

Schluter floor profiles improve the integrity of the tile assembly, are maintenance-free, and are available in a variety of shapes, sizes, materials, and finishes to complement the design of any room.

RENO-U (page 23)

Schluter®-SCHIENE

The Original Since 1975

For 50 years, tile professionals have relied on the Schluter-SCHIENE to securely protect the results of their work. Developed from practical experience by master tiler Werner Schlüter in 1975, our best-known product still offers superior edge protection today, thanks to its special design features:

- 1 87° angle from the anchoring leg for optimal load transfer
- 2 Coved channel for high strength and resistance to bending
- 3 Reinforced top section with 5° angle
- 4 Patented, integrated joint spacer

The details make the difference!

Schluter®-SCHIENE

Schluter®-SCHIENE features an 87° angle to transfer point loads and protect tile edges in tile coverings. Typical applications include edge protection where tile is bordered by carpet, at expansion joints, or as a decorative edging for stairs. SCHIENE in aluminum and brass, in sizes 1/4" (6 mm) and higher, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Note: Also available in stainless steel 316L (1.4404 = V4A). Contact Customer Service for pricing and availability.

Schluter®-TRENDLINE Textured Color-coated Aluminum

Schluter®-SCHIENE		
Length = 2.5 m - 8' 2-1/2"	Textured color-coated aluminum (TS)	
H = mm - in.	Item No.	\$ / Length
6 - 1/4	A 60 + color*	34.77
8 - 5/16	A 80 + color*	35.54
10 - 3/8	A 100 + color*	36.23
11 - 7/16	A 110 + color*	36.60
12.5 - 1/2	A 125 + color*	37.33

*Color Codes

* To complete the item number, add the **color** code (e.g., A 60 **TSC**).

Note: The anchoring leg of **Schluter®-SCHIENE** is available with a special radius perforation so that the profile can be used to form curves.

- Price surcharge: \$0.70 per foot
- Available in all materials
- Polished and color-coated aluminum finishes require a relatively large bending radius
- Item No.: R / Profile No. (e.g., R/A 80 AT)
- For delivery time, please call Customer Service

Matte White and Matte Black

Schluter®-SCHIENE

8 - 5/16	A 80 + color*	28.42
10 - 3/8	A 100 + color*	28.97
11 - 7/16	A 110 + color*	29.28
12.5 - 1/2	A 125 + color*	29.87

*Color Codes

* To complete the item number, add the **color** code (e.g., A 60 **MGS**).

SCHIENE in textured color-coated aluminum finishes is suitable for floor installations within residential applications only.

Schluter®-SCHIENE-RADIUS

Schluter®-SCHIENE-RADIUS is an extruded profile, with special perforations, for finishing and protecting the edges of curved tile coverings. SCHIENE-RADIUS provides edge protection while enhancing the aesthetic appearance of a curved design, including curved tile-to-tile transitions and curved outside wall corners, as well as curved designs in other surface coverings. Other sizes are available upon request.

Schluter®-SCHIENE-RADIUS

Schluter®-DECO

Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings such as wood or carpet. The profile features a 1/4" (6 mm)-wide visible surface.

Schluter®-DECO

Note: The anchoring leg of **Schluter®-DECO** is available with a special radius perforation so that the profile can be used to form curves.

- Price surcharge: \$0.70 per foot
- Available in all materials except stainless steel and chrome-plated solid brass
- Item No.: R / Profile No. (e.g., R/M 90 D)
- For delivery time, please call Customer Service

Schluter®-RENO-T

Schluter®-RENO-T is designed to provide transitions between existing, same-height, hard surface floor coverings, primarily in retrofit applications (e.g., ceramic tile or natural stone, parquet flooring, concrete pavers, laminate, etc.). RENO-T, in brass and anodized aluminum size 9/14, is flexible in the lateral direction and can be used in curved applications.

Schluter®-RENO-T

Schluter®-RENO-TK

Schluter®-RENO-TK is designed to protect tile edges and provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet. The 1/4" (6 mm) channel beneath the sloped flange of the profile hides and protects the cut edge of lower adjoining surface coverings. RENO-TK in anodized aluminum sizes 5/16" (8 mm) and larger features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

ADA-Compliant

Technical Note: ADA requirements regarding transitions between surfaces of different heights:

- Up to 6 mm (1/4") - no special requirements
- 6 mm (1/4") to 12.5 mm (1/2") - slope ratio, 1:2
- More than 12.5 mm (1/2") - slope ratio, 1:12

Schluter®-RENO-V

Schluter®-RENO-V is designed to protect tile edges and provide a smooth transition between tile coverings and floor coverings at lower elevations. The profile features a movable transition arm that allows the profile to adjust to the height of the adjacent floor covering via a ball-and-socket joint and eliminates trip hazards. RENO-V features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Schluter®-RENO-RAMP/-K

Schluter®-RENO-RAMP/-K are designed to protect tile edges and provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The sloped surface eliminates trip hazards and allows easy access for wheel carts. RENO-RAMP/-K feature an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

RENO-RAMP has an anchoring leg which is embedded in the tile bond coat.

RENO-RAMP-K is subsequently bonded adjacent to existing floor coverings.

ADA-Compliant

Note: 15 mm (9/16") and 20 mm (3/4") are not ADA-compliant.

Technical Note: ADA requirements regarding transitions between surfaces of different heights:

- Up to 6 mm (1/4") - no special requirements
- 6 mm (1/4") to 12.5 mm (1/2") - slope ratio, 1:2
- More than 12.5 mm (1/2") - slope ratio, 1:12

Schluter®-RENO-U

Schluter®-RENO-U is designed to protect tile edges and provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The sloped surface eliminates trip hazards and the leading edge of the profile abuts the lower surface covering. RENO-U in anodized aluminum features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

ADA-Compliant

Note: When leading edge abuts lower surface covering, sizes 20 mm (3/4") and 17.5 mm (11/16") are not ADA-compliant. When leading edge rests on top of lower surface covering, sizes 20 mm (3/4"), 15 mm (9/16"), and 17.5 mm (11/16") are not ADA-compliant.

Technical Note: ADA requirements regarding transitions between surfaces of different heights:

- Up to 6 mm (1/4") - no special requirements
- 6 mm (1/4") to 12.5 mm (1/2") - slope ratio, 1:2
- More than 12.5 mm (1/2") - slope ratio, 1:12

Schluter® Profiles

Finishing & edge-protection profiles for walls & countertops

From framing a shower niche to accentuating a fireplace surround, Schluter profiles add the perfect finishing touch to tiled walls as they conceal and protect exposed tile edges and eliminate the need for unsightly caulking. The assortment of available accessories eliminate the need for mitering, expedite installation time, and provide a nice, clean finish.

Resistant to staining, scratching, and high heat, tiled countertops require no maintenance and are easy to clean with standard household products. Cover the subassembly using a profile with a wide reveal, or frame a designated area for bonding accent tile. Do-away with caulking around the sink and bring the elegance of your tile installation to the next level.

Backsplash trim: QUADEC in bright white (page 42)
Counter trim: RONDEC-STEP in brushed chrome (page 51)

Schluter®-JOLLY

Schluter®-JOLLY is a decorative profile featuring a 90° angle designed to finish and protect external corners and other tile edges in wall applications. Its 90° angle creates a clean, flush look on wall corner installations, and the joint spacers on both sides of the profile ensure consistent grout joints and perfect symmetry. Matching corners are available, which feature innovative plug-in connections that result in clean, visually appealing corner applications.

Stainless Steel

Schluter®-JOLLY				
Length = 2.5 m - 8' 2-1/2"	Brushed stainless steel 304 (1.4301 = V2A) (EB)			
H = mm - in.	Profile	\$ / Length	Outside corner	\$ / Unit
6 - 1/4"	J 60 EB	47.29	EV / J 60 EB	23.30
8 - 5/16"	J 80 EB	49.09	EV / J 80 EB	23.30

Schluter®-JOLLY-P

Schluter®-JOLLY-P is a PVC profile featuring an 87° angle designed to finish and protect external corners and other tile edges in wall applications. The vertical wall section of the profile provides a decorative finish and protects adjacent tiles. JOLLY-P in sizes 5/16" (8 mm) and higher features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Get perfect cuts!

Schluter®-SNIPS for PVC profiles.
See page 197 for more information.

Schluter®-SCHIENE

Schluter®-SCHIENE is an edging profile featuring an 87° angle designed to finish and protect external corners and other tile edges. Though SCHIENE is typically used in floor applications, the finishes listed in this section are specifically suited for use in wall applications. SCHIENE in sizes 1/4" (6 mm) and higher features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Notes:

- Also available in chrome-plated brass. Contact Customer Service for pricing and availability.
- RADIUS available, see page 17 for details.

Please be advised that SCHIENE in Bright Black and Brushed Graphite Anodized Aluminum (AGSG and AGRB), Chrome-plated Brass (MC), and in all colors of Color-coated Aluminum are being discontinued. These items will only remain available while supplies last.

Please reference JOLLY as an alternative option to these discontinued SCHIENE finishes.

* Red brown (RB) is only available in sizes 80, 100, and 125.

* To complete the item number, add the color code (e.g., A 45 G).

Schluter®-RONDEC

Schluter®-RONDEC is a finishing and edge-protection profile for tiled edges and outside corners of tiled surfaces. The reveal of the profile forms a symmetrically rounded corner along the surface edge. RONDEC allows for color coordination with tile and grout and the creation of interesting accents in decorative designs. The profile can be combined with the Schluter®-DESIGNLINE border profile for further design options. RONDEC in aluminum and PVC features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Accessories

90° Outside corner

90° Inside corner

RONDEC prefabricated corners eliminate the need for a mitered edge.

EV/

ED/

Corners with item numbers beginning with EV/ are milled out of solid aluminum and corners with item numbers beginning with ED/ are die cast metal.

90° Double-leg outside corner (E2L/)

90° Double-leg inside corner (I2L/)

Double-leg corners simplify the framing of smaller elements with the RONDEC profile, such as niches, windows, etc. The legs are detachable for use in applications where a single-leg corner is needed.

Sink corner with 3/8" (10 mm) radius (I2S/)

Sink corner with 1-1/2" (38 mm) radius (ISK/)

Stainless steel sink corners are used with the RONDEC profile to produce tiled-under sinks. The corners have a large radius (3/8" - 10 mm or 1-1/2" - 38 mm) that allows them to match up to the contour of most standard sinks. The 3/8" corner piece features a double-leg design for ease of installation, while the 1-1/2" corner includes two stainless steel connectors to maintain the alignment of the corner piece and profiles during installation.

Connector Stainless Steel (V/)

Connector PVC (V/)

RONDEC connectors simplify the alignment of adjacent profile sections. Connectors are made of either PVC for aluminum profiles or stainless steel for stainless steel profiles.

End cap

End caps feature a bendable leg that is inserted into the RONDEC profile, and a brushed stainless steel plate that covers the open area of the profile in applications where the end of the profile is to be left exposed. RONDEC end caps can be used with stainless steel and brushed stainless steel RONDEC profiles.

Stainless Steel 304 (1.4301 = V2A)

Note: RONDEC in sizes 60, 80, 100, and 125 is also available in stainless steel 316L (1.4404 = V4A). Contact customer service for price and availability.

RONDEC in matte white (page 37)

Schluter®-QUADEC

Schluter®-QUADEC is a finishing and edge-protection profile for tiled edges and outside corners of tiled surfaces. The reveal of the profile forms a square outer corner along the surface edge. QUADEC allows for modern decorative design and interesting contrasts. The profile can be combined with the Schluter®-QUADEC-FS feature strip profile and/or the Schluter®-DESIGNLINE border profile for further design options. QUADEC, in stainless steel, can also be used as a stair nosing or floor transition profile. QUADEC in aluminum and PVC feature an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Note: Also available in chrome-plated brass, and stainless steel 316L (1.4404 = V4A). Contact Customer Service for pricing and availability.

QUADEC in cream (page 41)

Schluter®-QUADEC-K

Schluter®-QUADEC-K is a variant of the QUADEC profile without an anchoring leg. It features an open cavity that is filled with thin-set mortar to secure the profile in the assembly. Alternatively, the profile may be installed with an adhesive such as Schluter®-KERDI-FIX. QUADEC-K is installed in wall applications (e.g., wainscotings and bases) with coverings up to 1/2" (12.5 mm) thick. The profile is particularly suited for finishing edges in retrofit applications, such as thin porcelain panel installation over existing wall tiles.

Schluter®-QUADEC-FS

Schluter®-QUADEC-FS is a double-rail feature strip profile that features a recessed section to which field or accent tile is bonded. The profile can be used to produce accents in tile fields on walls, chair rails, and various other decorative applications. The profile can be combined with the Schluter®-QUADEC finishing and edge-protection profile. QUADEC-FS features integrated joint spacers that establish defined joint cavities between the accent tile and the profile.

Inside/outside corner /
End cap (EV/)

Note: The universal accessory piece can be used to produce a 90° inside corner, 90° outside corner, and end cap.

Schluter®-FINEC-SQ

Schluter®-FINEC-SQ is a finishing and edge-protection profile for outside corners of tile coverings. This minimalistic wall profile features a symmetrical 3/16" (4.5 mm) profile reveal that combines the slim look of Schluter®-FINEC with the square shape of Schluter®-QUADEC and a perforated anchoring leg that is secured in mortar bond coat beneath the tile. This profile is available in larger sizes to accommodate thicker tiles and is ideal for protecting mitered edges. Available in satin anodized aluminum, as well as color-coated aluminum in all TRENDLINE colors.

FINEC-SQ can be combined with QUADEC corner pieces

FINEC-SQ in matte black

Schluter®-FINEC

Schluter®-FINEC is a finishing and edge-protection profile for the external edges of tile coverings or mosaics. The finishing leg of the profile protects the covering edges from mechanical damage, and features a very slim, elegant reveal. Available in anodized aluminium, color-coated aluminum in all TRENDLINE colors, as well as stainless steel. FINEC is ideal for protecting mitered edges, while creating a discreet trim for a minimalist design.

Schluter®-RONDEC-DB

Schluter®-RONDEC-DB is a decorative profile for walls, wainscotings, and tile bases. The profile produces a pronounced visible surface that establishes a clean line along tile edges and allows for decorative design. RONDEC-DB can also be used as a finishing profile within wall surfaces. RONDEC-DB features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Schluter®-DESIGNLINE

Schluter®-DESIGNLINE is a border profile for producing decorative designs in tile fields on walls. DESIGNLINE in stainless steel can also be used to produce decorative designs in floors. The profile can be combined with Schluter®-QUADEC and Schluter®-RONDEC finishing and edge-protection profiles. DESIGNLINE in anodized aluminum features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Schluter®-DECO-SG

Schluter®-DECO-SG is a decorative profile featuring a 1/2" (12.5 mm) or 9/16" (15 mm) wide channel that creates a shadow gap between tile courses or other wall covering. The profile may also be used as a support channel for glass panels. The 1/2" (12.5 mm) wide channel accommodates glass panels up to a thickness of 3/8" (10 mm), and the 9/16" (15 mm) wide channel accommodates glass panels up to a thickness of 1/2" (12.5 mm). DECO-SG features a trapezoid-perforated anchoring leg that is secured in the bond coat beneath the tile.

Schluter®-DECO-SGC

Schluter®-DECO-SGC is a decorative profile featuring a 1/2" (12.5 mm) or 9/16" (15 mm) -wide channel used as a vertical support for glass panels in recessed showers that border on untiled walls that are plastered, creating a 90° angle between the glass partition and the untiled wall. The 1/2" (12.5 mm) wide channel accommodates glass panels up to a thickness of 3/8" (10 mm), and the 9/16" (15 mm) wide channel accommodates glass panels up to a thickness of 1/2" (12.5 mm). DECO-SGC features a trapezoid-perforated anchoring leg that is secured in the bond coat beneath the tile.

DECO-SG (page 49)

Schluter®-RONDEC-STEP

Schluter®-RONDEC-STEP is a finishing and edging profile for ceramic tile and dimension stone installations on countertops and stairs. The top of the profile features a symmetrically rounded edge that matches the Schluter®-RONDEC profile, while the vertical leg of the profile hides the exposed edge of the sub-assembly. RONDEC-STEP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Schluter®-RONDEC-CT

Schluter®-RONDEC-CT is a double-rail edging profile for countertops to be fitted with a ceramic or dimension stone tile covering. The face of the profile features a recessed section to which field or accent tile is bonded. The top and bottom edges of the profile are symmetrically rounded and match the Schluter®-RONDEC profile. RONDEC-CT features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Schluter®-SCHIENE-STEP

Schluter®-SCHIENE-STEP is a finishing and edging profile for ceramic tile and natural stone installations on countertops, stairs, and tile over tile applications on walls. The top of the profile features a vertical wall section that finishes and protects the tile from damage, while the vertical leg covers the edge of the sub-assembly, top of the riser, or existing wall tile edge.

Schluter®-SCHIENE-STEP

Schluter®-ECK-E

Schluter®-ECK-E is a stainless steel edging profile for outside corners of tiled walls that offers excellent edge protection against mechanical stresses in commercial/industrial applications. The profile produces a radiused edge along the outside wall corner for a clean, decorative finish. ECK-E is installed simultaneously with the tile, while ECK-K is subsequently installed on the outside corners of existing installations.

Note: ECK-E is also available in stainless steel 316L (1.4404 = V4A). Contact Customer Service for price and availability.

Schluter®-ECK-K

Schluter®-ECK-K is a stainless steel edging profile for outside corners of tiled walls that offers excellent edge protection against mechanical stresses in commercial/ industrial applications. The profile produces a radiused edge along the outside wall corner for a clean, decorative finish. ECK-K is subsequently bonded to the outside corners of existing installations. As such, ECK-K can be installed as a repair so that existing, damaged corners do not have to be replaced.

Note: ECK-K is also available in stainless steel 316L (1.4404 = V4A). Contact Customer Service for price and availability.

Schluter®-ECK-KHK

Schluter®-ECK-KHK is a stainless steel profile for inside wall corners that produces a radiused edge for a clean, decorative finish. ECK-KHK provides a 5/16" (8 mm) radius to prevent the accumulation of dirt and make cleaning simple. Thus, the profile is especially suited for commercial kitchens, bathrooms, food processing plants or any environment where a sanitary corner is desired. ECK-KHK is subsequently bonded to the inside corners of existing tile or other wall coverings. As such, the profile can be installed as a repair so that existing, damaged corners do not have to be replaced.

Schluter®-DESIGNBASE-SL

The **Schluter®-DESIGNBASE-SL** profile provides a modern alternative to traditional baseboards. The profile is available in brushed stainless steel, anodized aluminum, and color-coated aluminum. DESIGNBASE features a clean, sleek look, and is simply attached to the wall with a suitable adhesive. An optional sealing lip accessory is available to protect the floor/wall transition from moisture penetration and to reduce the transmission of impact sound.

The brushed stainless steel profile is available in 4-3/8" or 6-3/8" (110 or 160 mm) heights to meet code requirements for a commercial cove base.

The anodized and color-coated aluminum profiles are available in 2-3/8" or 3-1/8" (60 or 80 mm) heights.

Schluter® Profiles

Edge-protection & slip-resistant profiles for stairs

Tiled stair edges are vulnerable to chipping and breaking and create a slip hazard, especially in exterior applications. Schluter stair-nosing profiles protect exposed tile edges and improve safety on tiled stairways by providing slip-resistant wear surfaces and increased visibility—all while providing decorative accents within the tile covering.

Stair-nosing profiles are available in a variety of shapes, sizes, materials, and finishes, with options designed for both commercial and residential applications.

Schluter®-RONDEC-STEP

Schluter®-RONDEC-STEP is a finishing and edging profile for ceramic tile and dimension stone installations on countertops and stairs. The top of the profile features a symmetrically rounded edge that matches the Schluter®-RONDEC profile, while the vertical leg of the profile hides the exposed edge of the sub-assembly. RONDEC-STEP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.

Schluter®-SCHIENE-STEP

Schluter®-SCHIENE-STEP is a finishing and edging profile for ceramic tile and natural stone installations on countertops, stairs, and tile over tile applications on walls. The top of the profile features a vertical wall section that finishes and protects the tile from damage, while the vertical leg covers the edge of the sub-assembly, top of the riser, or existing wall tile edge.

SCHIENE-STEP is available in anodized aluminum and brushed stainless steel versions, which have different shapes and intended uses. The stainless steel version is available in three vertical leg lengths: 1-1/2" (39 mm), 1-3/16" (30 mm), and 7/16" (11 mm). The anodized aluminum version is intended for residential stair applications (stairs not exposed to heavy traffic). It is available in two vertical leg lengths, 1-3/16" (30 mm) and 1-1/2" (39 mm). The ribbed vertical leg covers the sub-assembly or top of the riser. The integrated joint spacer establishes a defined joint cavity between the tile and the profile.

Schluter®-TREP-FL

Schluter®-TREP-FL is a decorative stair-nosing profile with a protruding rounded edge that can be integrated into stairs covered with tile or stone. The profile protects the front edge of stairs and adds a high degree of safety by improving the visibility of the stair edges. The profile is available in stainless steel or anodized aluminum. TREP-FL is suitable for residential applications, e.g., stairs not exposed to heavy traffic.

Schluter®-TREP-E

Schluter®-TREP-E is designed to protect tiled stair edges and provide an easily visible, slip-resistant wear surface for durable, safe, and visually appealing stair-nosing design. The profile is made of stainless steel with an integrated slip-resistant tread, making it suitable for interior and exterior use in areas subjected to heavy foot-traffic, such as offices or public buildings. TREP-E features a trapezoid-perforated anchoring leg that is secured in the bond coat beneath the tile.

Note: Sizes 80, 110, and 160 are also available in stainless steel 316L (1.4404 = V4A). Contact Customer Service for pricing and availability.

i

A version without the anchoring leg for retrofit applications is also available. Please refer to TREP-EK on page 71.

Schluter®-TREP-G

Schluter®-TREP-G is designed to protect tiled stair edges and provide an easily visible, slip-resistant wear surface for durable, safe, and visually appealing stair-nosing design. The profile is made of stainless steel, making it suitable for interior and exterior use in areas subjected to heavy foot-traffic, such as offices or public buildings. The surface features a self-adhesive, non-slip tread with an embedded mineral grain coating, which can be replaced in case of damage or wear. TREP-G features a trapezoid-perforated anchoring leg that is secured in the bond coat beneath the tile.

Note: Sizes 130 and 150 are not stocked. Please call Customer Service for delivery times.

Schluter®-TREP-V

Schluter®-TREP-V is an anodized aluminum profile with a PVC tread designed to protect tiled stair edges. The specially textured slip resistant tread makes TREP-V well suited for use in areas with heavy foot traffic, such as offices or public buildings. The replaceable PVC tread is available in a variety of colors including high visibility options. TREP-V is available with either a narrow (TREP-V 42) or wide (TREP-V 60) tread. End caps are also available.

Schluter®-TREP-SE/-S/-B

Schluter®-TREP-SE/-S/-B are designed to protect tiled stair edges and provide an easily visible, slip-resistant wear surface for durable, safe, and visually appealing stair-nosing design. They are suitable for use in areas subjected to heavy foot-traffic, such as offices or public buildings. The profiles feature a trapezoid-perforated anchoring leg made of stainless steel (-SE) or aluminum (-S and -B), with a slip-resistant, thermoplastic rubber wear surface. The tread surface is available in a variety of colors and can be replaced in case of damage or wear.

Note: Radius of leading edge for TREP-S and TREP-B: 8 mm - 5/16".

Schluter®-TREP-TAP

Schluter®-TREP-TAP is an anodized aluminum cover profile that integrates with the Schluter®-TREP-S/-B stair-nosing profiles to conceal the top of the riser. There are two options available: a 2-13/32" (61 mm) version featuring horizontal grooves, and a 2" (50 mm) version with a smooth surface finish.

Schluter®-TREP-TAP

Safety can be retrofitted

The installation of stair nosing profiles is not always a consideration during the initial construction of stairs. Schluter®-TREP profiles are also available for retrofit installation to help you enhance the safety of stairs at a later point. Schluter®-KERDI-FIX ensures the secure installation of these profiles:

- Schluter®-TREP-EK with slip-resistant wear surface
- Schluter®-TREP-EFK for bonding in milled grooves
- Schluter®-TREP-GK with replaceable, self-adhesive non-slip tread

TREP-GK (page 72)

Schluter®-TREP-EK

Schluter®-TREP-EK is designed to protect tiled stair edges and provide an easily visible, slip-resistant wear surface for durable, safe, and visually appealing stair-nosing design. The profile is made of stainless steel with an integrated slip-resistant wear surface, making it suitable for interior and exterior use in areas subjected to heavy foot-traffic, such as offices or public buildings.

TREP-EK is subsequently bonded to existing installations. As such, TREP-EK can be installed as a repair so that existing, damaged stair treads do not have to be replaced.

Schluter®-TREP-EK

Stainless steel 304 (1.4301 = V2A) (E)

Item No.	\$ / Length
Length = 2.5 m - 8' 2-1/2"	
TEK	58.30
Length = 1.50 m - 4' 11"	
TEK/150	34.98

Schluter®-TREP-EFK

Schluter®-TREP-EFK is a retrofit stainless steel stair profile which is bonded to existing steps. The stair profile features an easily visible, slip-resistant wear surface for durable and safe stairs. The profile is suitable for interior and exterior use in areas subjected to heavy foot traffic, such as offices or public buildings.

Schluter®-TREP-EFK

Stainless steel 316L (1.4404 = V4A) (E)

Item No.	\$ / Length
Length = 2.5 m - 8' 2-1/2"	
TEF56K/V4A	75.78

Schluter®-TREP-GK

Schluter®-TREP-GK is designed to protect tiled stair edges and provide an easily visible, slip-resistant wear surface for durable, safe, and visually appealing stair-nosing design. The profile is made of stainless steel, making it suitable for interior and exterior use in areas subjected to heavy foot-traffic, such as offices or public buildings. The surface features a self-adhesive, non-slip tread with an embedded mineral grain coating, which can be replaced in case of damage or wear.

TREP-GK is subsequently bonded to existing installations. As such, TREP-GK can be installed as a repair so that existing, damaged stair treads do not have to be replaced.

Schluter®-TREP-GK-S

* To complete the item number, add the color code (e.g., GS EBK **GS**).

Schluter® Profiles

Movement joint & cove-shaped profiles

Movement joints are an integral part of any tile assembly and must be incorporated within the tile field at doorsills, and at transitions to walls and other restraining structures to allow movement of the assembly and prevent stresses that can damage the system. Schluter movement joint profiles protect tile edges and prevent sound bridges and surface water penetration, resulting in a permanent, maintenance-free installation.

Cove bases are a practical and hygienic method for treating floor-to-wall or wall-to-wall transitions, as they provide a curved surface that is easy to clean and prevent the accumulation of dirt. Schluter cove-shaped profiles provide an attractive, clean, and maintenance-free alternative for inside wall corners and floor/wall (including countertop/backsplash) transitions. Plus, they completely eliminate the need for caulk.

Schluter®-DILEX-MOP

Schluter®-DILEX-MOP is a screed joint profile with rigid PVC side sections that protect tile edges and a soft PVC movement zone that separates individual fields in the tile assembly and forms the visible surface. DILEX-MOP is designed to provide movement joints in tile installations that are set in a mortar bed (e.g., ceramic tile, natural stone, pavers, and agglomerate tile).

Note: Available only in grey.

Schluter®-DILEX-MOP

Length = 2.5 m - 8' 2-1/2"	Screed joint profile	
H = mm - in.	Item No.	\$ / Length
35 - 1-3/8	MOP 35 G	19.67
50 - 2	MOP 50 G	25.09
65 - 2-5/8	MOP 65 G	29.20

WARNING: Cancer www.P65Warnings.ca.gov

Schluter®-DILEX-MP/-MPV

Schluter®-DILEX-MP is a screed joint profile with rigid PVC side sections that protect tile edges and a soft chlorinated polyethylene (CPE) movement zone that separates individual fields in the tile assembly and forms the visible surface. The movement zone is available in different colors to match the grout. DILEX-MP is designed to provide movement joints in tile installations that are set in a mortar bed (e.g., ceramic tile, natural stone, pavers, and agglomerate tile). DILEX-MP adjusts to the thickness of the mortar bed and tile surface by attaching the DILEX-MPV extensions.

Schluter®-DILEX-MP

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

Schluter®-DILEX-BWS

Schluter®-DILEX-BWS is a surface joint profile with rigid PVC anchoring legs that protect tile edges and a 3/16" (5 mm)-wide, soft CPE movement zone that separates individual fields in the tile covering and forms the visible surface. The movement zone is available in different colors to match the grout. The profile absorbs relatively limited movements and may be installed with greater frequency to create smaller fields, or the Schluter®-DILEX-BWB (3/8" - 10 mm movement zone) may be used. DILEX-BWS is suitable for residential to medium-duty commercial applications subject to light mechanical loads (e.g., offices and stores).

Schluter®-DILEX-BWS

20 - 3/4	BWB 200 G (Grey only)	29.62	

Schluter®-DILEX-F

Schluter®-DILEX-F is a surface joint profile with rigid, recycled PVC anchoring legs and a narrow replaceable silicone inlay that ties together tile fields to form a seamless visible surface. The carrier profile (DILEX-FCS) has a protective cover that is removed after tile installation and replaced with the selected color of silicone insert (DILEX-FIS). The trapezoid-perforated anchoring legs transfer movement to the profile movement zone. The special silicone inlay is equipped with anti-stretch properties and a low-friction coating that repels dust. The inlay is approximately 1/8" (3.5 mm) wide when installed and available in 10 colors to match the grout. The DILEX-F system is suitable for residential to medium-duty commercial applications subject to light mechanical loads (e.g., offices and stores).

Schluter®-DILEX-FCS

Length = 2.5 m - 8' 2-1/2"			Carrier profile with protective cover
H = mm - in.	Item No.	\$ / Length	
9 - 11/32	FCS 90	14.09

12.5 - 1/2	FCS 125	14.09	

*Color Codes

* To complete the item number, add the **color** code (e.g., FIS 300 **G**).

Schluter®-DILEX-FIS

Silicone inlay		
Length = 31 m - 100'		
Item No.	\$ / Length	
FIS 300 + color*	275.26	

An installation tool is included with each roll of silicone inlay to facilitate cleaning of the joint and insertion of the inlay.

Schluter®-DILEX-KSN

Schluter®-DILEX-KSN is a surface joint profile with stainless steel or aluminum anchoring legs that protect tile edges and a 7/16" (11 mm)-wide, soft thermoplastic rubber movement zone that separates individual fields in the tile covering and forms the visible surface. The movement zone is available in different colors to match the grout and can be replaced if damaged. DILEX-KSN in stainless steel offers secure edge protection for surfaces exposed to heavy-duty commercial traffic (e.g., warehouses, production facilities, or shopping malls).

Note: DILEX-KSN is also available in stainless steel 316L (1.4404 = V4A). Contact Customer Service for price and availability.

¹ The colors cream (C), stone grey (SG), grout grey (FG), and dark anthracite (DA) are only available in the following profile sizes:
EKSN sizes 100, 110, 125, 140, and 160
AKSN sizes 100, 110, and 125

Schluter®-DILEX-AKWS

Schluter®-DILEX-AKWS is a surface joint profile with aluminum anchoring legs that protect tile edges and a 1/4" (6 mm)-wide, soft PVC movement zone that separates individual fields in the tile covering and forms the visible surface. The movement zone is available in different colors to match the grout. DILEX-AKWS is suitable for residential to medium-duty commercial applications, such as areas subject to moderate mechanical stresses, including light vehicular traffic.

An adhesive strip on the back of the profile ensures that the movement zone remains free of mortar during installation.

Schluter®-DILEX-AKWS

*Color codes

* To complete the item number, add the **color** code (e.g., AKWS 80 **G**).

Schluter®-DILEX-EKSB

Schluter®-DILEX-EKSB is a surface joint profile for thinner floor coverings (e.g., VCT flooring or coatings) with stainless steel anchoring legs and a 1/4" (6 mm)-wide, soft thermoplastic rubber movement zone that separates individual fields in the floor covering and forms the visible surface. The movement zone is available in different colors. DILEX-EKSB is suitable for residential to medium-duty commercial applications.

*Color Codes

* To complete the item number, add the **color** code (e.g., EKSB 60 **G**).

Schluter®-DILEX-EKSB

Length = 2.5 m - 8' 2-1/2"			Stainless steel 304 (1.4301 = V2A) (E)	
H = mm - in.	Item No.		\$ / Length	
2.5 - 3/32	EKSB 25 + color*		93.42	
4.5 - 3/16	EKSB 45 + color*		98.79	
6 - 1/4	EKSB 60 + color*		102.67	

Schluter®-DILEX-EDP

Schluter®-DILEX-EDP is a stainless steel surface joint profile that protects tile edges and separates individual fields in the tile covering. The profile accommodates horizontal movement via the 15/32" (12 mm)-wide stainless steel tongue-and-groove connection, which also forms the visible surface. DILEX-EDP is particularly suited for tile surfaces subject to heavy use, including areas exposed to continuous vehicular traffic. The profile is, therefore, suited for use in production facilities, warehouses, shopping centers, and underground parking garages, or for floor surfaces maintained with cleaning machines.

Schluter®-DILEX-EDP

Length = 2.5 m - 8' 2-1/2"			Stainless steel 304 (1.4301 = V2A) (E)	
H = mm - in.	Item No.		\$ / Length

16 - 5/8	EDP 160		127.03	
21 - 13/16	EDP 210		132.98	

Schluter®-DILEX-BT

Schluter®-DILEX-BT is an expansion joint profile made of anodized aluminum that bridges expansion joints and accommodates movement via the 1-3/16" (30 mm)-wide telescopic center section, which also forms the visible surface. DILEX-BT protects tile edges and is suitable for tile surfaces exposed to foot traffic as well as vehicular traffic and is, therefore, suited for use in warehouses, production facilities, shopping centers, airports, train stations, and parking garages, or for coverings cleaned with machines.

Schluter®-DILEX-BT

Length = 2.5 m - 8' 2-1/2"	Satin anodized aluminum (AE)	
H = mm - in.	Item No.	\$ / Length
8 - 5/16	AEBT 80	171.31
10 - 3/8	AEBT 100	174.15

15 - 9/16	AEBT 150	180.32
17.5 - 11/16	AEBT 175	183.93
20 - 3/4	AEBT 200	193.26

Schluter®-DILEX-BTO

Schluter®-DILEX-BTO is an expansion joint profile made of anodized aluminum that bridges expansion joints at floor/wall transitions and accommodates movement via the 1-3/16" (30 mm)-wide telescopic center section, which also forms the visible surface. DILEX-BTO protects tile edges and is suitable for tile surfaces exposed to foot traffic as well as vehicular traffic and is, therefore, suited for use in warehouses, production facilities, shopping centers, airports, train stations, and parking garages, or for coverings cleaned with machines.

Schluter®-DILEX-BTO

Length = 2.5 m - 8' 2-1/2"	Satin anodized aluminum (AE)	
H = mm - in.	Item No.	\$ / Length
8 - 5/16	AEBT 80/O 125	176.72

17.5 - 11/16	AEBT 175/O 125	183.16
20 - 3/4	AEBT 200/O 125	187.67

Schluter®-DILEX-BTS

Schluter®-DILEX-BTS is an expansion joint profile made of anodized aluminum that bridges expansion joints and accommodates movement via the 1-3/16" (30 mm)-wide telescopic center section, which also forms the visible surface. The profile is installed in completed tile coverings. DILEX-BTS protects tile edges and is suitable for tile surfaces exposed to foot traffic as well as vehicular traffic and is, therefore, suited for use in warehouses, production facilities, shopping centers, airports, train stations, and parking garages, or for coverings cleaned with machines.

Note: DILEX-BTS can be inserted into existing joint spaces. The joints must be at least 1-3/4" (44 mm) wide and 3/8" (10 mm) deep.

Schluter®-DILEX-BTS

Length = 2.5 m - 8' 2-1/2"	Satin anodized aluminum (AE)	
H = mm - in.	Item No.	\$ / Length
10 - 3/8	AEBTS 100	177.44

▲ Schluter®-DILEX-STF

Schluter®-DILEX-STF is a maintenance-free expansion joint profile system made of aluminum. The interlocking center section allows for movement in 3 directions - horizontal, vertical, and along the length of the profile. The profile is fastened to the substrate with screws for a secure installation.

Available in 6 height and width combinations, it protects tile edges and can accommodate horizontal movement up to ± 1/4" (6 mm) in the 1-9/16" (40 mm) width, and ± 3/8" (10 mm) in the 2" (50 mm) width. DILEX-STF is intended for use in areas with heavy passenger and vehicle traffic, such as warehouses, production facilities, shopping centers, airports, train stations, or floor coverings cleaned by machine.

Schluter®-DILEX-AS

Schluter®-DILEX-AS is a perimeter joint profile with a rigid PVC anchoring leg and a flexible joining leg with self-adhesive tape to bond the profile to fixed building elements (e.g., bathtubs, shower trays, door and window frames). DILEX-AS isolates the tile covering from the fixed building element and accommodates movement via the flexible joining leg, which also forms the visible surface. Suitable for tiles 3/16" to 3/8" (4 – 10 mm) thick.

Schluter®-DILEX-KSA

Schluter®-DILEX-KSA is a perimeter joint profile with a stainless steel or aluminum anchoring leg and a 3/8" (10 mm)-wide, soft thermoplastic rubber movement zone that isolates the tile covering from fixed building elements (e.g., window and door frames). The movement zone is available in different colors to match the grout and can be replaced if damaged. The profile also features a self-adhesive strip that allows it to bond to the fixed building elements.

Note: DILEX-KSA is also available in stainless steel 316L (1.4404 = V4A). Contact Customer Service for price and availability.

*Color Codes

* To complete the item number, add the color code (e.g., EKSA 80 G).

Schluter®-DILEX-BWA

Schluter®-DILEX-BWA is a perimeter joint profile with a rigid PVC anchoring leg and a 3/16" (5 mm)-wide, soft CPE movement zone that isolates the tile covering from fixed building elements (e.g., bathtubs, shower trays, door and window frames) and forms the visible surface. The movement zone is available in different colors to match the grout. The profile also features a dovetailed channel made of rigid PVC that can be bonded to the fixed building elements.

*Color Codes

* To complete the item number, add the **color** code (e.g., BWA 80 **G**).

** BWA 45 is not available in Sand Pebble (SP)

Schluter®-DILEX-EKE

Schluter®-DILEX-EKE is a corner movement joint profile with rigid PVC anchoring legs and a 3/16" (5 mm)-wide, soft CPE movement zone that separates individual tile fields at floor/wall transitions and inside wall corners and forms the visible surface. The movement zone is available in different colors to match the grout and forms a discreet, uniform joint. DILEX-EKE prevents surface water penetration and prevents sound bridges, making it ideal for floor/wall transitions in sound-rated floors.

*Color Codes

* To complete the item number, add the **color** code (e.g., EKE U 8 / O 7 **BW**).

Schluter®-SNIPS for PVC profiles.
See page 197 for more information.

Schluter®-DILEX-HKW

Schluter®-DILEX-HKW is a PVC cove-shaped profile for inside wall corners and floor/wall transitions in applications where limited movement is expected. The profile provides an 11/16" (18 mm) radius to prevent the accumulation of dirt and makes cleaning simple. DILEX-HKW accommodates wall and floor tiles that are of the same thickness. DILEX-HKW prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, food processing plants, or any tiled environment where a sanitary cove base is desired.

*Color Codes

* To complete the item number, add the **color** code (e.g., HKW U 9 / O 9 **HB**).

Schluter®-DILEX-HK

Schluter®-DILEX-HK is a cove-shaped profile with rigid PVC anchoring legs and a soft CPE movement zone that separates individual tile fields at floor/wall transitions and forms the visible surface. The profile provides an 11/16" (18 mm) radius to prevent the accumulation of dirt and makes cleaning simple. DILEX-HK accommodates wall and floor tiles of dissimilar thicknesses and features a tile pocket that hides cut tile edges. DILEX-HKW integrates with DILEX-HK where cove trim is required for inside wall corners. DILEX-HK prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, food processing plants, or any tiled environment where a sanitary cove base is desired. DILEX-HK also prevents sound bridges, making it ideal for floor/wall transitions in sound-rated floors.

*Color Codes

Schluter®-DILEX-AHK

Schluter®-DILEX-AHK is a cove-shaped profile with a single trapezoid-perforated anchoring leg for inside wall corners, countertop/backsplash transitions and floor/wall transitions in applications where limited movement is expected. DILEX-AHK provides a 3/8" (10 mm) radius to prevent accumulation of dirt and makes cleaning simple. DILEX-AHK is available in anodized aluminum and textured color-coated aluminum. DILEX-AHK prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, food processing plants, or any tiled environment where a sanitary cove base is desired.

Note: 90° outside corners are available in 2 configurations. The "round" corner (E90/) features a rounded front that integrates with RONDEC, while the "square" corner (E90Q/) features a square shaped front that integrates with QUADDEC.

NEW!

Now available in Matte White and Matte Black!

Schluter®-DILEX-AHKA

Schluter®-DILEX-AHKA is a coved-shaped profile for transitions between walls to be tiled and previously finished floors. DILEX-AHKA is available in anodized aluminum and textured color-coated aluminum. The profile features a single-trapezoid perforated anchoring leg that is secured in the mortar bond coat and a dovetailed channel, which can be bonded to floor surfaces using Schluter®-KERDI-FIX, epoxy resin, silicone, thin-set mortar, etc. A 3/8" (10 mm) radius cove section forms the visible surface and prevents the accumulation of dirt, making cleaning simple. DILEX-AHKA prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, food processing plants, or any tiled environment where a sanitary cove base is desired. DILEX-AHKA integrates with the Schluter®-DILEX-AHK and Schluter®-RONDEC profiles at 90° inside and outside vertical wall corners, respectively.

NEW!

Now available in Matte White and Matte Black!

Outside corner (90° or 135°)

End cap

Inside corner (90° or 135°)

90° inside corners can be used 2-way, or 3-way when combined with DILEX-AHK on the vertical inside corner.

Schluter®-DILEX-PHK

Schluter®-DILEX-PHK is a PVC, cove-shaped profile for inside wall corners, countertop/backsplash transitions and floor/wall transitions in applications where limited movement is expected. DILEX-PHK provides a 3/8" (10 mm) radius to prevent the accumulation of dirt and makes cleaning simple. DILEX-PHK prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, food processing plants, or any tiled environment where a sanitary cove base is desired.

Outside corner (90° or 135°)

Inside corner (90° or 135°)

90° inside corners can be used 2-way or 3-way.

Schluter®-DILEX-HKS

Schluter®-DILEX-HKS is a stainless steel, cove-shaped profile for inside wall corners, and floor/wall transitions in applications. DILEX-HKS features a soft, thermoplastic rubber movement zone to absorb larger movements at floor/wall transitions and inside wall corners and a 23/32" (18.5 mm) radius to prevent the accumulation of dirt and makes cleaning simple. DILEX-HKS prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, food processing plants, or any tiled environment where a sanitary cove base is desired.

Note: DILEX-HKS is also available in stainless steel 316L (1.4404 = V4A). Contact Customer Service for price and availability.

Schluter®-DILEX-HKU

Schluter®-DILEX-HKU is a stainless steel, cove-shaped profile for inside wall corners and floor/wall (including countertop/backsplash) transitions. DILEX-HKU may be used with floor coverings other than ceramic and stone tile, provided the floor coverings are fastened or adhered (i.e., no floating floors). The profile features a single anchoring leg that turns inward, which allows it to be used with different thicknesses of tile. DILEX-HKU is available with either a 3/8" (10 mm) or 1-7/16" (36 mm) radius cove section. The cove section forms the visible surface and prevents the accumulation of dirt, making cleaning simple. DILEX-HKU prevents surface water penetration and meets the maintenance and hygienic requirements of commercial kitchens, bathrooms, and food processing plants, or any tiled environment where a sanitary cove base is desired.

Schluter®-VINPRO

Profiles designed for resilient surface coverings (LVT)

Luxury vinyl and other resilient flooring materials have improved and evolved into a whole new generation of vinyl floor coverings. Mimicking the natural looks of wood and stone using high-fidelity printing, the product is durable and realistic in both finish and texture. Following trends or creating custom layouts, resilient coverings are not limited to floors and can offer a fresh design and additional warmth to walls in a residential or commercial environment.

VINPRO is a series of finishing, edge-protection and transition profiles designed for luxury vinyl and other resilient coverings, for floors, walls, and stair surfaces.

VINPRO-STEP-R in brushed antique bronze
(page 99)

Schluter®-VINPRO-S

Schluter®-VINPRO-S is designed to provide edging for resilient coverings (e.g., LVT). Typical applications include edge protection where the resilient covering is bordered by carpet, floor coverings of similar heights, or as a finishing edge to wall skirting applications. The profile features a 1/4" (6 mm) or 7/16" (11 mm) wide sloped top flange to hide the cut edge of the resilient floor covering, providing a finished look.

Schluter®-VINPRO-U

Schluter®-VINPRO-U is designed to provide a smooth transition between resilient floor coverings (e.g. LVT) and floor coverings at lower elevations or finished concrete. The profile features a 1/4" (6 mm) or 7/16" (11 mm) wide sloped top flange to hide the cut edge of the resilient floor covering, providing a finished look.

ADA-Compliant

In installations where the leading edge abuts a lower surface covering, all sizes of VINPRO-U are compliant with the Americans with Disabilities Act (ADA). In installations where the leading edge rests on top of the lower floor covering (e.g., finished concrete), the 7/16" (11 mm) and 1/2" (12.5 mm) sizes are not ADA-compliant.

Technical Note: ADA requirements regarding transitions between surfaces of different heights:

- Up to 6 mm (1/4") - no special requirements
- 6 mm (1/4") to 12.5 mm (1/2") - slope ratio, 1:2
- More than 12.5 mm (1/2") - slope ratio, 1:12

Schluter®-VINPRO-STEP

Schluter®-VINPRO-STEP is a finishing and edging profile for resilient floor covering (e.g. LVT) installations on stairs. Two versions are available: the 1/8"-3/16" (3-5 mm) version featuring a 1/4" (6 mm) wide top flange that is grooved to add slip resistance to the horizontal surface, and the 7/32" (5.5 mm) and larger versions that feature a 7/16" (11 mm) wide top flange with a smooth horizontal surface finish. The vertical leg covers the edge of the subassembly and top of the riser.

Schluter®-KERDI-BOARD

Waterproof, tile-ready substrates & building panels

Whether you work with mosaics or large-format tiles, an absolutely flat substrate with straight and precisely aligned inside and outside corners is essential for creating a perfect tile covering, which tile installers can now achieve on their own using KERDI-BOARD.

KERDI-BOARD gives tile setters control over their projects by providing them with the means to simply and easily create ideal substrates for tile. Unsuitable substrates can be remedied and new substrates can be produced while keeping the technical and aesthetic requirements of the tile covering in mind.

Schluter®-KERDI-BOARD

Schluter®-KERDI-BOARD is a multifunctional tile substrate and building panel, which can also be used for creating bonded waterproofing assemblies with tile coverings. It consists of an extruded polystyrene foam panel, with a special reinforcement material on both sides and fleece webbing for effective anchoring in thin-set mortar.

With the available panel thicknesses of 3/16", 3/8", 1/2", 5/8", 3/4", 1", 1-1/2", and 2" (5, 9, 12.5, 15, 19, 25, 38, and 50 mm), KERDI-BOARD allows the installer to prepare and create a broad range of substrates and building elements for the installation of ceramic and natural stone tile that are flat, level, plumb, square, and dimensionally stable. With suitable preparation of the abutting seams and joint areas, the panel may be used for bonded waterproofing assemblies.

The boards are simply cut to size with a utility knife. The gridlines, which are printed on the surface, are helpful for neat and quick cuts and installation. Tiles can be installed directly over KERDI-BOARD using the thin-set method.

KERDI-BOARD By Pallet

The KERDI-BOARD panels listed in the table below are shipped in full pallets only. Please order in multiples of the pallet quantity.

Schluter®-Systems

Waterproofing & uncoupling membranes

Ceramic and stone tiles are durable, easy to maintain, and hygienic, representing the ideal surface coverings. However, today's lightweight construction methods can make the installation of hard surface coverings particularly challenging. Schluter Systems has developed state-of-the-art installation systems that address the problems associated with today's construction methods, allowing the installation of ceramic and stone tiles on virtually any surface.

DITRA provides uncoupling to prevent cracked tiles and grout, while providing effective waterproofing to protect moisture-sensitive substrates. KERDI is a pliable, sheet-applied waterproofing membrane and vapor-retarder ideal for use in tiled showers, bathtub surrounds, and other wet areas.

NEW! DITRA-PS

Peel and stick
uncoupling membrane (page 111)

Schluter®-DITRA and Schluter®-DITRA-XL

Schluter®-DITRA and **Schluter®-DITRA-XL** are polyethylene uncoupling membranes with a grid structure of square cutback cavities and an anchoring fleece laminated to the underside. DITRA and DITRA-XL provide uncoupling through the open rib structure, which allows for in-plane movement that effectively neutralizes the differential movement stresses between the substrate and the tile, thus eliminating the major cause of cracking and delaminating of the tiled surface. In conjunction with tile coverings, DITRA and DITRA-XL form an uncoupling, waterproofing, and vapor management layer, while providing support/load distribution. The combination of these four essential functions allows for the successful installation of tile over a wide range of substrates, including plywood/OSB, concrete, gypsum, heated floors, etc.

DITRA is 1/8" (3.5 mm) thick, which minimizes tile assembly thickness and reduces transitions to lower surface coverings (e.g., carpet, engineered wood, and vinyl). DITRA allows for ceramic tile application over single-layer plywood or OSB subfloors on joists spaced up to 19.2" (488 mm) o.c. DITRA is listed by cUPC®.

DITRA-XL is 5/16" (7 mm) thick, which permits even transitions between tile and 3/4"-thick hardwood flooring. DITRA-XL allows for ceramic tile application over single-layer plywood/OSB subfloors on joists spaced up to 24" (610 mm) o.c.

DITRA and DITRA-XL were evaluated according to the "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers, Version 1.1 for California Specification 01350 and found to comply with the VOC requirements. California Specification 01350 is referenced by various green building standards and rating systems.

For complete information, a step-by-step installation video and the DITRA Installation Handbook are available for download at: **Schluter.com** or by contacting our Customer Service.

Schluter®-DITRA

Schluter®-TROWEL
See page 196

Schluter®-DITRA-PS

Schluter®-DITRA-PS is a peel and stick membrane that features a pressure-sensitive adhesive (PSA) to bond the membrane to the substrate, replacing the need for thin-set mortar. Simply remove the transparent release film from the fleece side of the membrane to expose the layer of adhesive and embed into the substrate using a float, screed trowel, or DITRA-ROLLER. DITRA-PS offers the same core functions as DITRA: uncoupling, support/load distribution, waterproofing, and vapor management.

Note: For applications requiring compliance with or certification to the ANSI A118.10 American National Standard Specifications for Load Bearing, Bonded, Waterproof Membranes for Thin-Set Ceramic Tile and Dimension Stone Installation, select the DITRA membrane that is installed with thin-set mortar. Alternatively, the DITRA-PS membrane may be covered with the Schluter®-KERDI membrane, which is certified to meet ANSI A118.10.

Schluter®-KERDI and Schluter®-KERDI-DS

Schluter®-KERDI is a pliable sheet-applied polyethylene waterproofing membrane and vapor retarder that guarantees uniform thickness. It is covered with an anchoring fleece on both sides to anchor the membrane in thin-set mortar and is suitable for waterproofing in conjunction with tiled surfaces on walls and floors. KERDI is 8-mil thick and has a water vapor permeance of 0.90 perms, when tested according to ASTM E96, using Procedure E at 90% relative humidity.

Schluter®-KERDI-DS is a bonded waterproofing membrane and vapor retarder with very low water vapor permeance for use in continuous use steam rooms and similar applications. KERDI-DS is 20-mil thick and features additives to produce a water vapor permeance of 0.19 perms, when tested according to ASTM E96, using Procedure E at 90% relative humidity.

KERDI and KERDI-DS meet the American National Standard for Load Bearing, Bonded, Waterproof Membranes for Thin-Set Ceramic Tile and Dimension Stone Installations (ANSI A118.10). The membranes are listed by cUPC® and evaluated by ICC-ES (Report Nos. ESR-2467 and PMG-1204).

KERDI and KERDI-DS have been evaluated according to the "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers, Version 1.1" for California Specification 01350 and found to comply with the VOC requirements. California Specification 01350 is referenced by various green building standards and rating systems.

Schluter®-KERDI-FIX

Schluter®-KERDI-FIX is a single-component sealing and bonding compound with a silane-modified polymer base. It is odor-neutral, UV- and weather-resistant, and contains no solvents. KERDI-FIX is elastomeric and bonds well to most materials, such as wood, stone, concrete, metal, glass, and many plastics. KERDI-FIX is suitable for bonding the Schluter®-KERDI waterproofing membrane and Schluter®-KERDI-BAND to fixed building elements. KERDI-FIX is also suitable for use as a sealant.

Schluter®-KERDI-FIX

Schluter®-REFLEECE

Removable fleece

Whether you want to cover an existing hard surface floor covering for a fresh new look or want to create a temporary floor covering that will be easy to remove in the future, REFLEECE offers a practical solution. The self-adhesive fleece enables the simple removal of coverings without leaving any residue or damaging the subfloor.

Schluter®-REFLEECE

Schluter®-REFLEECE is a removable fleece used to create temporary floor coverings. Made of recycled PET with a self-adhesive coating on the back, REFLEECE measures 1/32" (0.8 mm) thick and is suitable for the application of temporary, removable tile and natural stone coverings. REFLEECE is easy to install and can be removed during deconstruction without causing damage to the existing subfloor. An impact sound improvement value up to 9dB was measured (according to DIN EN ISO 10140) for this assembly. Install with the Schluter®-KERDI-BOARD-ZSA adhesive tape for connecting REFLEECE at the seams.

Schluter®-REFLEECE

Underlayment for temporary floor coverings 0.8 mm - 1/32"

Schluter®-DITRA-HEAT-E

Electric floor warming system with integrated uncoupling technology

Ceramic and stone tiles are the ideal surface coverings because they are durable, easy to maintain, and hygienic. However, two common barriers to the selection of tile as a floor covering are concerns about cracking and the perception that tiles are cold.

DITRA-HEAT integrates customizable, comfortable electric floor warming with the functions associated with DITRA: uncoupling, waterproofing, vapor management and support to ensure a long lasting installation, thereby addressing the two most common concerns.

DITRA-HEAT-PS (page 120)

All the benefits of our original electric floor warming system, now with a peel & stick self-adhesive backing to get the job done even faster.

Schluter®-DITRA-HEAT and DITRA-HEAT-DUO

Schluter®-DITRA-HEAT and **DITRA-HEAT-DUO** are polypropylene membranes with a cut-back stud structure and an anchoring fleece laminated to the underside. Both membranes are designed to secure the DITRA-HEAT-E-HK electric floor heating cables and provide uncoupling, waterproofing, vapor management and support to ensure a long lasting installation.

DITRA-HEAT-DUO offers the same functions as DITRA-HEAT, but features a thicker bonding fleece that adds two more benefits, while still supporting the covering to ensure a lasting installation:

Sound Control

DITRA-HEAT-DUO reduces impact sound transmission through floor-ceiling assemblies, making it ideal for multi-story construction. DITRA-HEAT-DUO provides a ΔIIC contribution of 20, when tested per ASTM E2179 in a thin-set assembly with porcelain tile.

Thermal Break

DITRA-HEAT-DUO reduces heat loss to the substrate to improve the floor warming response time over concrete substrates by up to 70%.

The thickness of the mat, including the stud structure, of DITRA-HEAT is 1/4" (5.5 mm) and DITRA-HEAT-DUO is 5/16" (8 mm).

The DITRA-HEAT and DITRA-HEAT-DUO membranes feature cutting grooves, which provide an easy-cut guide and enhanced membrane flexibility.

For complete information, a step-by-step installation video, Installation Handbook, and Technical Data Sheet are available for download at: www.schluter.com or by contacting our Customer Service.

Schluter®-DITRA-HEAT

Uncoupling and waterproofing membrane

Item No.	Dimensions	Format	\$ / ft²*	\$ / Unit
DH5 12M	0.98 m x 12.76 m = 12.5 m² 3' 2-5/8" x 41' 10-3/4" = 134.5 ft²	Roll	3.17	426.37
DH5 MA	0.98 m x 0.8 m = 0.78 m² 3' 2-5/8" x 2' 7-3/8" = 8.4 ft²	Sheet	3.29	27.67

* The price per square foot is for estimation purposes only. Please order using the price per roll or per sheet.

Schluter®-DITRA-HEAT-DUO

Uncoupling and waterproofing membrane with sound control and thermal break

Item No.	Dimensions	Format	\$ / ft²*	\$ / Unit
DHD8 10M	0.98 m x 10.2 m = 10 m² 3' 2-5/8" x 33' 6-1/2" = 108 ft²	Roll	4.55	491.18
DHD8 MA	0.98 m x 0.8 m = 0.78 m² 3' 2-5/8" x 2' 7-3/8" = 8.4 ft²	Sheet	4.76	39.96

* The price per square foot is for estimation purposes only. Please order using the price per roll or per sheet.

Schluter®-SET, Schluter®-ALL-SET, and Schluter®-FAST-SET
See page 192

Schluter®-TROWEL
See page 196

Schluter®-DITRA-HEAT-PS and DITRA-HEAT-DUO-PS

Schluter®-DITRA-HEAT-PS and **DITRA-HEAT-DUO-PS** are peel and stick membranes that feature a pressure-sensitive adhesive (PSA) to bond the membrane to the substrate, replacing the need for thin-set mortar. Simply remove the transparent release film from the fleece side of the membrane to expose the layer of adhesive and embed into substrate using a float, screed trowel, or DITRA-ROLLER. The -PS versions offer the same core functions as DITRA-HEAT and DITRA-HEAT-DUO. Both peel and stick membranes are designed to secure the DITRA-HEAT-E-HK electric floor heating cables, and provide uncoupling, waterproofing, vapor management, and load support to ensure a long-lasting tile installation.

DITRA-HEAT-DUO-PS features a thicker bonding fleece that additionally provides sound control to reduce impact sound transmission through floor-ceiling assemblies and a thermal break that reduces heat loss to the substrate to improve floor warming response time, particularly over concrete substrates.

DITRA-HEAT-PS is 1/4" (5.5 mm) -thick and DITRA-HEAT-DUO-PS is 5/16" (8 mm) -thick. Both membranes feature cutting grooves, which provide an easy-cut guide and enhanced membrane flexibility.

A primer is not required to install DITRA-HEAT-PS/-DUO-PS, however, a primer such as Schluter®-PRIMER-PS or PRIMER-U is recommended when installing on a difficult-to-bond-to substrate.

Note: For applications requiring compliance with or certification to the ANSI A118.10 American National Standard Specifications for Load Bearing, Bonded, Waterproof Membranes for Thin-Set Ceramic Tile and Dimension Stone Installation, select the DITRA-HEAT or DITRA-HEAT-DUO membranes that are installed with thin-set mortar. Alternatively, the DITRA-HEAT-PS or DITRA-HEAT-DUO-PS membranes may be covered with the Schluter®-KERDI membrane, which is certified to meet ANSI A118.10.

For complete information, a step-by-step installation video, Installation Handbook, and Technical Data Sheet are available for download at: Schluter.com or by contacting our Customer Service.

Schluter®-DITRA-HEAT-E-HK

Schluter®-DITRA-HEAT-E-HK are twisted pair heating cables designed for integration with the DITRA-HEAT uncoupling membrane in interior floor warming applications. The cables can be installed without returning to the thermostat and produce virtually zero electromagnetic fields.

BEFORE ordering heating cables, see IMPORTANT ordering information on page 123.

Each heating cable includes 2 floor temperature sensors compatible with the Schluter®-DITRA-HEAT-E thermostats and features an approximately 7 ft (2.1 m) long cold lead.

Schluter®-DITRA-HEAT-E-HK Heating Cables 208 V Applications

Schluter®-DITRA-HEAT offers complete flexibility when creating warm floors in any application. DITRA-HEAT-E-HK heating cables are designed for use with common 120 V and 240 V power sources. 208 V power sources are used in some cases to handle larger loads (e.g., HVAC equipment, motors, etc.) or to improve energy efficiency.

Schluter-Systems recommends using the DITRA-HEAT-E-HK 240 V heating cables when a 208 V power source is present. However, this will reduce the heating power by 25% to 9.5 W/ft² at the standard 3-stud cable spacing, which may not be sufficient power to warm the floor in these applications. To offset the effect

of the lower voltage, we recommend installing the heating cable at a 2-stud spacing in these applications. This results in an increased heating power of 14.2 W/ft², which will ensure adequate performance.

The heating cable will cover 33% less area when spaced at 2 studs compared to 3 studs. Therefore, a longer heating cable must be selected to cover a given area in these applications. Coverage for each 240 V heating cable spaced at 2 studs can be found in the table below.

DITRA-HEAT-E-HK 240 V Heating Cables in 208 V Applications at 2 Stud Spacing

Item No.	Length (ft - m)	Area (ft ² - m ²)	Power (W)	Average Power (W/ft ² - W/m ²)	Current (A)
DHE HK 240 11	35.3 – 10.8	7.1 – 0.7	101	14.2 - 152.8	0.5
DHE HK 240 16	53.1 – 16.2	10.7 – 1.0	152	14.2 - 152.8	0.7

DHE HK 240 183	605.9 – 184.7	122.1 – 11.4	1740	14.2 - 152.8	8.4
DHE HK 240 204	673.8 – 205.4	135.8 – 12.6	1935	14.2 - 152.8	9.3
DHE HK 240 225	744.4 – 226.9	150.1 – 13.9	2138	14.2 - 152.8	10.3

We recommend consulting with a qualified electrician for design and installation of your DITRA-HEAT system on a 208 V power source. Keep in mind during design of the system that the DITRA-HEAT-E thermostats have an electrical current limit of 15 A.

IMPORTANT Ordering Information for Schluter®-DITRA-HEAT Cables

- Do not purchase a heating cable the same size as the area to be tiled; this will be too much heating cable!
- Very important: **Never CUT or modify the heating cable in any way.** This would change the cable resistance, will cause damage to the cable, and could cause cable overheating.
- A cable spacing of 3 studs is standard
- Cable may also be spaced at continuously alternating 3 stud – 2 stud – 3 stud intervals in isolated areas or over the entire floor. This practice may be desirable to increase heat output (e.g., over uninsulated on or below grade concrete subfloors) or to consume more cable length in a given area (e.g., when using the standard 3 stud spacing doesn't allow the selected cable to fit the floor area and respect minimum spacing requirements from walls, partitions, etc.)
- A cable spacing of 4 studs is not recommended, as it can produce inconsistent floor surface temperatures
- Minimum spacing from walls, partitions, and fixed cabinets is 2" (50 mm).
- Minimum spacing from other heat sources (baseboard heaters, fireplaces, etc.) is 8" (200 mm).
- Minimum spacing from any plumbing drain and forced air heating ducts is 4" (100 mm).
- Minimum spacing from the centerline of toilet drain is 7" (180 mm).
- The heating section of the cable must be entirely installed under the floor covering. The installation is characterized as a Type C (Embedded Floor Warming) application. In order to prevent a fire hazard, do not install it anywhere else (e.g. in a wall).
- NEVER install the heating cable under vanities with no air space beneath, bathtub platforms, free-standing bathtubs with no air space beneath, kitchen cabinets or any other fixtures or in clothing closets. Excessive heat will build up in these confined spaces and may cause cable overheating.
- It is helpful to plan the location of a buffer zone, as it is not possible to predict where the heating cable will end. The buffer zone is an area where heating is not essential and heating cable installation is not planned (e.g., behind a toilet or adjacent to a door opening). This area allows for placement of excess heating cable. Heating cables may also be installed 6" (150 mm) from the wall to create a buffer zone.
- Heating cable testing is required while the heating cable is on the spool and at two subsequent steps during installation to ensure cable quality and for warranty purposes.

Schluter®-DITRA-HEAT-E-HK-RK Heating Cable Repair Kit and Schluter®-DITRA-HEAT-E-HK-SK Heating Cable Splice Kit

Schluter®-DITRA-HEAT-E-HK-RK is a repair kit for DITRA-HEAT-E-HK heating cables. The kit contains all the material to replace one section of heating cable (gray section) up to 10" (25 cm) long or less in the event of damage, such as cuts by other trades during installation.

Schluter®-DITRA-HEAT-E-HK-SK is a splice kit for DITRA-HEAT-E-HK heating cables. The kit contains all the material to replace one factory splice of the heating cable.

Please visit www.schluter.com for ordering information.

WARNINGS

- Heating cable repairs must be conducted by a qualified electrician in accordance with this heating cable repair procedure, the National Electric Code (USA) or Canadian Electric Code Part I (CAN) as applicable and the Schluter®-DITRA-HEAT Installation Handbook. All electrical connections must be made by a qualified electrician, according to the electrical and building codes effective in your region.
- **Prior to commencing a repair:** Any known deviations from the Schluter®-DITRA-HEAT Installation Handbook and/or applicable code(s) must be corrected. All cable installation and repair instructions must be followed in order to avoid personal injuries or property damage.
- Do not use these kits to splice different heating cables together. These kits are only intended for making repairs to a single cable.
- The heating cable cannot be shortened or altered to fit.
- **Very important:** Never CUT the heating cable. This could change the cable resistance and could lead to a fire.
- **WARRANTY DISCLAIMER:** Any deviation from the DITRA-HEAT Installation Handbook (which includes damage to the DITRA-HEAT-E-HK heating cables) voids the Schluter®-DITRA-HEAT Limited limited Warranty and warranty coverage is not reinstated upon repair of the heating cable. SCHLUTER SYSTEMS FURTHER DISCLAIMS ANY AND ALL WARRANTIES EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ANY AND ALL LIABILITY ARISING FROM THE ELECTRICIAN SERVICES.

Schluter®-DITRA-HEAT-E Thermostats

Schluter®-DITRA-HEAT-E digital thermostats control the DITRA-HEAT-E-HK heating cables (both 120 V and 240 V). All thermostats feature a 5 mA built-in ground fault circuit interrupter (GFCI) with indicator light, and have an electrical current limit of 15 amps.

Schluter®-DITRA-HEAT-E-WiFi programmable Wi-Fi thermostat offers all the same features as the Programmable Touchscreen model, with additional Wi-Fi functionality that enables the user to control the DITRA-HEAT electric floor warming system from a mobile app or online.

Schluter®-DITRA-HEAT-E-RT programmable touchscreen thermostat features six programming periods per day, a set-up wizard, energy log, and a QR code for quick access to system settings.

Schluter®-DITRA-HEAT-E-R non-programmable version features simple on/off functionality.

R

Schluter®-DITRA-HEAT-E-RR

Schluter®-DITRA-HEAT-E-RR is a power module that extends power output when used in conjunction with the DITRA-HEAT-E-WiFi, -RT, or -R thermostats. The power module is designed to be used in large floor applications where the heating load exceeds 15 amps, in order to maintain a single point of control. Up to 16 DITRA-HEAT-E-RR power modules may be connected in series via low voltage signal wire to a single DITRA-HEAT-E-WiFi, -RT, or -R thermostat. The power module also features a 5 mA built-in GFCI.

Smart Thermostat for the DITRA-HEAT Floor Warming System

"Hey Google,
turn up my floor
warming!"

"Alexa, set my
floor warming to
75-degrees."

Schluter®-DITRA-HEAT-E-RS1 Smart Thermostat

Schluter®-DITRA-HEAT-E-RS1 smart thermostat features a sleek, versatile design with a mirror finish, and third-party integration with popular voice and home assistants to easily include floor warming into your smart home capabilities. Works with Apple Home, Google Home, and Alexa. Download the Schluter Smart Thermostat app to get convenient, remote access to your DITRA-HEAT floor warming system. The DITRA-HEAT-E-RS1 thermostat controls both the 120 V and 240 V DITRA-HEAT-E-HK heating cables. It features a Class A (5 mA) built-in ground fault circuit interrupter (GFCI) with indicator light and has an electrical current limit of 15 amps.

Schluter®-DITRA-HEAT-E-RRS

Schluter®-DITRA-HEAT-E-RRS is a power module specifically designed for the DITRA-HEAT-E-RS1 smart thermostat. The power module may be used when the heating load exceeds 15 amps (e.g., in large floor applications) to maintain a single point of control. Features an input and output voltage of 120 V, 208 V, or 240 V, and a control input from the thermostat of 24 Vdc. The power module also includes a built-in class A GFCI.

Schluter®-Shower System

Complete waterproofing system for tiled showers

Schluter Systems provides an integrated family of products in which the individual components collectively form a bonded watertight assembly. The Schluter-Shower System eliminates the risk of failures due to both vapor and water penetration, is maintenance-free, and dramatically reduces total installation time.

Waterproofing

Waterproofing membranes provide protection—and peace-of-mind—behind your shower walls and other tiled elements subject to moisture.

KERDI and KERDI-DS are pliable, sheet-applied, bonded waterproof membranes and vapor retarders with limited crack-bridging capabilities. Accessories made out of KERDI, including waterproofing strips, seamless corners, and pipe and mixing valve seals help complete the waterproofing process to ensure that your shower or bath surround is well-protected against mold and mildew.

Schluter®-KERDI and Schluter®-KERDI-DS

Schluter®-KERDI is a pliable sheet-applied polyethylene waterproofing membrane and vapor retarder that guarantees uniform thickness. It is covered with an anchoring fleece on both sides to anchor the membrane in thin-set mortar and is suitable for waterproofing in conjunction with tiled surfaces on walls and floors. KERDI is 8-mil thick and has a water vapor permeance of 0.90 perms, when tested according to ASTM E96, using Procedure E at 90% relative humidity.

Schluter®-KERDI-DS is a bonded waterproofing membrane and vapor retarder with very low water vapor permeance for use in continuous use steam rooms and similar applications. KERDI-DS is 20-mil thick and features additives to produce a water vapor permeance of 0.19 perms, when tested according to ASTM E96, using Procedure E at 90% relative humidity.

KERDI and KERDI-DS meet the American National Standard for Load Bearing, Bonded, Waterproof Membranes for Thin-Set Ceramic Tile and Dimension Stone Installations (ANSI A118.10). The membranes are listed by cUPC® and evaluated by ICC-ES (Report Nos. ESR-2467 and PMG-1204).

KERDI and KERDI-DS have been evaluated according to the "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers, Version 1.1" for California Specification 01350 and found to comply with the VOC requirements. California Specification 01350 is referenced by various green building standards and rating systems.

Schluter®-KERDI-SEAL-PS/-MV

Schluter®-KERDI-SEAL-PS/-MV pre-fabricated seals are cut sections of the Schluter®-KERDI waterproofing membrane designed to seal protrusions through the Schluter®-KERDI or Schluter®-DITRA/DITRA-XL, as well as Schluter®-KERDI-BOARD building panels. Schluter®-KERDI-SEAL-PS and -MV feature overmolded rubber gaskets and are used to seal pipe protrusions and protect moisture-sensitive solid backing panels at the mixing valve.

Schluter®-KERDI-DRAIN

Point drain with integrated bonding flange

Schluter®-KERDI-DRAIN is a shower drain with an integrated bonding flange that provides a large contact area for a secure connection to the KERDI waterproofing membrane at the top of the assembly. The grate assembly can be seamlessly adjusted to the thickness and layout of the ceramic tile or stone covering. KERDI-DRAIN is available with several grate designs, including a frameless tileable covering support, and offered in nine TRENDLINE colors to match with Schluter®-SHELF, trim profiles, and fixtures.

Schluter®-KERDI-DRAIN and Schluter®-KERDI-DRAIN-H

Schluter®-KERDI-DRAIN and **KERDI-DRAIN-H** are floor drains with an integrated bonding flange that provides a large contact area for a secure connection to the Schluter®-KERDI waterproofing membrane at the top of the assembly. Both KERDI-DRAIN and KERDI-DRAIN-H are appropriate for both mortar bed and Schluter®-KERDI-SHOWER-T/-TS/-TT shower tray applications. The bonding flange is sloped to simplify installation of the mortar bed.

The KERDI-DRAIN flange provides a vertical connection to the drain pipe and is available in ABS or PVC with 2" or 3" (50 or 75 mm) outlet, and stainless steel with a 2" or 3" (50 or 75 mm) no-hub outlet or 2" (50 mm) threaded outlet.

The KERDI-DRAIN-H flange provides a horizontal connection to the drain pipe and is available in ABS or PVC with a 2" (50 mm) outlet. It is ideal for applications where the use of a vertical connection to the drain pipe is not possible or practical (e.g., suspended or post-tension concrete floors, basement slabs, or wood floor installations where relocating the hole in the floor is not practical). The horizontal outlet allows the positioning of the drain in the desired area regardless of drain pipe location.

A compensation board is available for use with KERDI-DRAIN-H in conjunction the KERDI-SHOWER-T/-TS/-TT shower trays.

KERDI-DRAIN and KERDI-DRAIN-H feature a fully adjustable grate (available in stainless steel and anodized aluminum in various finishes) that accommodates a wide range of tile thicknesses: 1/4" (6 mm) to 1-1/4" (32 mm); or a tileable covering support that accommodates any tile thickness and creates a virtually invisible drainage line. The grate assembly allows lateral and tilt adjustment as well. Please note that grate assemblies used with the plastic KERDI-DRAIN featuring 3" (75 mm) outlets only allow vertical and tilt adjustment (no lateral adjustment). 6" (150 mm)-square stainless steel covers are also available for installations where KERDI-DRAIN or KERDI-DRAIN-H are to be used in a cleanout application.

Selecting your Schluter®-KERDI-DRAIN

Schluter®-KERDI-DRAIN flanges and grates are sold separately.

1 Select your grate from pages 134 - 137.

2 Select the flange appropriate for your application from the tables on pages 138 - 143.

i

- When using a flange with a 3" (75 mm) outlet, a 6" (150 mm) grate is recommended.
- When using the KERDI-DRAIN-F flange, the 4" (100 mm) tileable grate and 6" (150 mm) round and square grates are not suitable.
- When using the KERDI-DRAIN-A flange with 5-1/2" (140 mm) adaptor ring, the 6" (150 mm) round and square grates are not suitable.

ADAPTOR KITS — 5-1/2" or 7-1/2" (140 or 191 mm)

Schluter®-KERDI-DRAIN-A

Schluter®-KERDI-DRAIN-A ADAPTOR KITS are used to convert traditional clamping ring drains to integrated bonding flange drains when removal of the clamping ring drain is not practical. A steel adaptor ring with an overmolded rubber gasket replaces the clamping ring and is sealed to the existing drain body using Schluter®-KERDI-FIX. The bonding flange then slides into the adaptor ring and seals against the rubber gasket. Adaptor kits are suitable for both mortar bed and Schluter®-KERDI-SHOWER-T/-TS/-TT shower tray applications.

NEW! The 5-1/2" (140 mm) adaptor kit features an improved configuration!

- The ring has been modified to make it compatible with a larger variety of clamping ring drains.
- The flange now accommodates the tileable grate.

140 mm - 5-1/2" adaptor kit		
Flange and ring	1 UNIT

FLOOR DRAIN WITH INTEGRATED KERDI COLLAR

Schluter®-KERDI-DRAIN-F

Schluter®-KERDI-DRAIN-F is a floor drain specifically designed to allow connections to Schluter®-DITRA and DITRA-HEAT uncoupling membranes in floor applications. The drain body is available in polypropylene or stainless steel, each with a laminated Schluter®-KERDI collar that ensures a simple connection to the uncoupling membrane on the floor and at wall transitions. KERDI-DRAIN-F features a flat, narrow bonding flange to allow for placement against walls or in corners on floors. It can be combined with virtually any KERDI-DRAIN grate assembly, with the exception of the tileable grate and the 6" (150 mm) square and round grates. The grate assembly is sold separately, please refer to pages 134 to 136.

Schluter®-KERDI-DRAIN-F - Floor drain with narrow bonding flange and integrated KERDI collar

6" SQUARE CLEAN OUT COVER

The **Schluter®-KERDI-DRAIN Clean Out Cover** is a 6" (150 mm) stainless steel cover available for installations where the KERDI-DRAIN bonding flange is to be used in a cleanout application. The KERDI-DRAIN bonding flange is sold separately.

Clean out cover 150 mm - 6"		
Item No.	Finish	\$ / Unit
KD-GR6C-E	Stainless steel	184.67

TAMPER PROOF SCREWS

Schluter®-KERDI-DRAIN Tamper Proof Screws are designed as a high security accessory for the KERDI-DRAIN. Ideal for loss prevention and anti-theft, these tamper proof screws are used in environments where tamper resistance is desired or required (e.g., healthcare or education facilities, etc.). Phillips head screws are included with the KERDI-DRAIN. The tamper-proof screws as well as the driver bit must be purchased separately.

Tamper proof screw and driver bit		
Item No.	Description	\$ / Unit
KD/TPSCRW	Tamper proof screw (1)	3.21
KD/TPWRCH	Driver bit (1)	15.65

STRAINER

The **Schluter®-KERDI-DRAIN Strainer** is a hair catcher customized to fit inside the KERDI-DRAIN flange to trap and collect hair. Simple to remove and clean, the hair catcher fits discreetly into the drain to prevent hair clogs that can lead to blocked pipes.

Note: The KERDI-DRAIN strainer is only suitable for use with flanges with 2" (50 mm) vertical outlets (ABS, PVC, and stainless steel with no-hub or threaded outlet).

Item No.	Description	\$ / Unit
KD-STR	Strainer	3.57

Schluter® Linear Drains

Discover the benefits of Schluter® linear drains for an enhanced shower experience. Upgrade your tiled shower with the KERDI-LINE low-profile drain, ideal for curbless bathrooms. With various grate designs, including a tileable option, it's suitable for wall or intermediate locations in showers, steam rooms, and wet rooms. For a customizable solution, consider the KERDI-LINE-VARIO, which can be cut on-site for specific project needs. It comes in 4-foot and 8-foot lengths with four slim and modern grate designs.

NEW! TRENDLINE finishes available for
KERDI-LINE (page 150) and **KERDI-LINE-VARIO** (page 156)

NEW! KERDI-LINE-A

Convert a traditional clamping ring drain to a KERDI-LINE linear drain (page 152).

Schluter®-KERDI-LINE

The **Schluter®-KERDI-LINE** is a low profile linear floor drain specifically designed for bonded waterproofing assemblies. KERDI-LINE can be installed adjacent to walls or at intermediate locations in showers, wet rooms, and other applications that require waterproofing and drainage. The floor can be sloped on a single plane to KERDI-LINE, which enables the use of large-format tiles and creates interesting design opportunities.

The KERDI-LINE channel body is made of formed stainless steel 316L (1.4404 = V4A) and features a collar made of Schluter®-KERDI for a secure waterproof connection. The grate assembly is available in six design options:

- A - SOLID
- B - SQUARE
- D - TILE
- E - FLORAL
- F - CURVE
- G - PURE

If KERDI-LINE is placed at shower entrance, it is recommended that grate assembly A (SOLID), G (PURE), or D (TILE) is chosen and that the drainage openings span the maximum width of the shower entrance to limit potential overflow; secondary drainage (e.g., KERDI-DRAIN) may be required in the drying area.

Grate and frame assemblies A and B are made of stainless steel 316L (1.4404 = V4A) and available in brushed, chrome, or textured color-coated finishes. The brushed stainless steel grate assemblies can be adjusted for use with tile coverings from 1/8" to 1" (3 mm to 25 mm)-thick, and the chrome and color-coated versions can accommodate tiles from 1/8" to 9/16" (3 mm to 15 mm)-thick. The TILE grate (D) is frameless and can accommodate any thickness of tile covering. Grate and frame assemblies E, F and G (KERDI-LINE-STYLE) are available in brushed stainless steel and can accommodate tile coverings from 1/4" to 11/16" (6 - 18 mm)-thick.

NEW!

- SOLID and SQUARE grate designs are now available in matte white and 7 TRENDLINE colors. See pages 149 & 150.
- KERDI-LINE-A adaptor ring converts a traditional clamping ring drain to a KERDI-LINE linear drain. See page 152.

Selecting your Schluter®-KERDI-LINE

Schluter®-KERDI-LINE channel bodies and grates are sold separately.

- 1 Select the appropriate channel body length and outlet placement from the tables on page 147.
- 2 Proceed to grate selection accordingly from pages 148 - 152, keeping in mind there are two frame height options for the SQUARE and SOLID grates in brushed stainless steel.

All configurations of KERDI-LINE are listed by ICC-ES (Report No. PMG-1204), UPC®, and CSA. For copies of these documents, please contact Schluter®-Systems at 800-472-4588 or by email at info@schluter.com. Links to the documents can also be accessed at Schluter.com.

LINEAR DRAIN ADAPTOR KIT — 5-1/2" (140 mm)

▲ Schluter®-KERDI-LINE-A

Schluter®-KERDI-LINE-A is an adaptor kit designed to convert a traditional clamping ring drain to a KERDI-LINE linear drain when removal of the clamping ring drain is not practical (e.g., when it is set in concrete slabs). The steel adaptor ring features an over-molded rubber gasket and a variety of perforated hole patterns that align with most common clamping ring shower drains. The adaptor ring replaces the clamping ring and is attached to the drain body using the clamping ring bolts. This connection is made watertight via the rubber gasket and KERDI-FIX adhesive/sealant. The KERDI-LINE channel body outlet slides into the adaptor ring, with a tight fit to the over-molded rubber gasket, ensuring a watertight seal. The KERDI-LINE-A adaptor kit is suitable for both mortar bed and KERDI-SHOWER-LT/-LTS shower tray applications.

STRAINER

The **Schluter®-KERDI-LINE Strainer** is a hair catcher customized to fit inside the KERDI-LINE channel body to trap and collect hair. Simple to remove and clean, the hair catcher fits discreetly into the drain to prevent hair clogs that can lead to blocked pipes.

Schluter®-KERDI-LINE-VARIO

Variable length linear drain

The next generation of linear drains is here: KERDI-LINE-VARIO is a variable length linear drain for tiled showers. The stainless steel channel and grate assembly can be cut to size on-site, and are therefore customizable to fit various shower sizes.

NEW! Now available in TRENDLINE textured color-coated finishes. See page 156.

Schluter®-KERDI-LINE-VARIO

Schluter®-KERDI-LINE-VARIO is a low-profile, variable length linear shower drain specifically designed for bonded waterproofing assemblies. KERDI-LINE-VARIO can be initially cut to size on-site to fit the specific dimensions of the shower. The floor can be sloped on a single plane to KERDI-LINE-VARIO, which enables the use of large-format tiles and creates interesting design opportunities.

The KERDI-LINE-VARIO flange comprises an injection molded polypropylene drain body featuring a standard 2" (50 mm) NPT outlet and is supplied with PVC and ABS couplings. The perimeter consists of a bonding flange laminated with a collar made of KERDI for a simple and secure connection to the bonded waterproofing assembly, both in the floor area and on adjacent walls. KERDI-LINE-VARIO can be installed in conjunction with the KERDI-SHOWER-LT/-LTS shower trays or with a mortar bed.

The KERDI-LINE-VARIO channel and grate assembly is made of formed stainless steel 316L (1.4404 = V4A) and is designed to be trimmed to length to ensure a proper fit in custom applications. The channel features a drainage opening in the center. The flange outlet may be positioned anywhere within the overall trimmed length of the channel to avoid obstacles encountered during construction (e.g., floor joists). The grate nests into the corresponding channel. If the grate is trimmed, the supplied end caps are used to provide a clean finished look.

The KERDI-LINE-VARIO grate assembly features a minimal reveal after installation and is available in brushed stainless steel or TRENDLINE textured color-coated finishes in four designs:

- SQUARE
- FLORAL
- HERRINGBONE
- SLANT

The KERDI-LINE-VARIO flange kit and the grate and channel kit must be purchased separately.

Notes:

- The shortest allowable length to cut the channel and grate is 10" (25.4 cm).
- The minimum recommended tile thickness to use with the KERDI-LINE-VARIO channel is 3/8" (10 mm).
- KERDI-LINE-VARIO is best suited for placement against the wall but can also be installed in the center of the shower. For drain placement at the entrance of the shower, please refer to the KERDI-LINE linear drain.
- KERDI-LINE-VARIO drains are designed to meet the International Plumbing Code (IPC) guideline for a single standard showerhead with a maximum flow of 2.5 gpm (9.5 L/m). For showers with higher flow, the KERDI-LINE linear drain is recommended.

i

All configurations of KERDI-LINE-VARIO are listed by ICC-ES (Report No. PMG-1204) and UPC®. For copies of these documents, please contact Schluter®-Systems at 800-472-4588 or by email at info@schluter.com. Links to the documents can also be accessed at Schluter.com.

Prefabricated Substrates

Prefabricated shower trays, curbs, ramps, benches, and niches integrate seamlessly with KERDI and KERDI-BOARD shower assemblies, and are ideal solutions for including mortar-free shower components in any tiled shower. Quick and easy to install, Schluter prefabricated substrates combine comfort, convenience, and design and are available in multiple sizes and shapes to fit any décor.

Schluter®-KERDI-SHOWER-T/-TS/-TT

Schluter®-KERDI-SHOWER-T/-TS/-TT are sloped shower trays with integrated KERDI waterproofing. The trays are made of lightweight, expanded polystyrene for constructing mortar-free shower bases. Each of these prefabricated shower trays is designed to integrate with the Schluter®-KERDI-DRAIN.

The **KERDI-SHOWER-T** is the standard tray with center drain placement.

SHOWER SYSTEM

Schluter®-KERDI-SHOWER-LT/-LTS

Schluter®-KERDI-SHOWER-LT/-LTS are polystyrene sloped trays with integrated Schluter®-KERDI waterproofing. Each of these prefabricated shower trays is designed to integrate with the Schluter®-KERDI-LINE.

The **KERDI-SHOWER-LT** allows for the installation of a center drain.

Schluter®-KERDI-SHOWER-CB

Schluter®-KERDI-SHOWER-CB is a height compensation board made of lightweight expanded polystyrene. Two versions are available:

- The 1" (2.5 cm)-thick compensation board is used to accommodate the adaptor ring height when installing the KERDI-DRAIN-A or KERDI-LINE-A adaptor in conjunction with a KERDI-SHOWER prefabricated shower tray.

- The 3-1/2" (8.9 cm)-thick compensation board is used to accommodate the drain body and waste pipe height, when installing the KERDI-DRAIN-H in conjunction with the KERDI-SHOWER-T/TS/TT shower trays.

The compensation board can easily be cut to size to fit around the drain and waste pipe in KERDI-DRAIN-H applications or the adaptor ring in KERDI-DRAIN-A applications. Multiple boards can be used to fit the size and shape of the shower.

*The 1" (2.5 cm)-thick compensation board (KSCB 25 610 1220) is sold in bundles of 6 units. Please order in multiples of the bundle quantity.

Schluter®-KERDI-SHOWER-R

Schluter®-KERDI-SHOWER-R is a lightweight, expanded polystyrene shower ramp with integrated Schluter®-KERDI waterproofing designed to facilitate the construction of access ramps for tiled showers. The ramp integrates with the Schluter®-Shower System to create accessible, curbless showers and adheres to the ADA's slope ratio.

Schluter®-KERDI-BOARD-SC

Schluter®-KERDI-BOARD-SC is a prefabricated shower curb made of KERDI-BOARD that is designed to integrate with the Schluter®-Shower System. The curb is lightweight, stable, and load bearing. It can be used in conjunction with the KERDI-SHOWER prefabricated shower trays as well as in mortar bed applications. KERDI-BOARD-SC is quick and easy to install, waterproof and ready to tile, making it a simple solution for tiled shower curbs.

Schluter®-KERDI-BOARD-SNLT

Schluter®-KERDI-BOARD-SNLT is a prefabricated shower niche made of KERDI-BOARD that incorporates a mounting profile with a diffused Schluter®-LIPROTEC LED light strip. A pre-installed, waterproof connection box at the top of the niche ensures that the electrical connection is code compliant. KERDI-BOARD-SNLT features a 1/2" (12.5 mm) -thick by 2" (50 mm) -wide integrated bonding flange and is available in 3 sizes designed for a vertical installation and 2 sizes designed for a horizontal installation.

The mounting profile is made of anodized aluminum with satin finish (AE) and is sized to fit along the top of the niche. The LED light strip is encased in a silicone tube that nests into the mounting profile and provides an evenly diffused line of light.

Schluter®-LIPROTEC-ECX

Schluter®-LIPROTEC-ECX is an all-in-one LED power supply and in-wall dimmer switch that eliminates compatibility issues between drivers and dimmer switches. LIPROTEC-ECX is designed for use with the KERDI-BOARD-SNLT niche with white LED strip. Three interchangeable face plates (white, light almond, and dark brown) are included to match most decors.

Note: the trim plate must be purchased separately.

- Dimming range: 5% to 100%
- Can control multiple KERDI-BOARD-SNLT niches (up to 60 watts)
- Fits in a standard electrical box
- UL listed in USA and Canada

Schluter®-LIPROTEC-ECX

LT ECX 1W	120V AC	24V DC	60 W	280.98

⚠ WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

Schluter®-LIPROTEC-ECD

Schluter®-LIPROTEC-ECD is an in-line dimmable driver that is hard wired into your electrical, designed for use with the KERDI-BOARD-SNLT niche with white LED strip. It is compatible with a range of popular dimmer switches, allowing you to have matching light switches throughout your bathroom. LIPROTEC-ECD includes a metal enclosure and must be installed in an accessible location, such as a closet or vanity.

Note: a compatible dimmer switch must be purchased separately, refer to the compatibility list on www.schluter.com

- Dimming range: 5% to 100%
- Can control multiple KERDI-BOARD-SNLT niches (up to 24 watts)
- UL listed in USA and Canada

Schluter®-LIPROTEC-CW

Schluter®-LIPROTEC-CW cables are designed to connect the KERDI-BOARD-SNLT niche to the LIPROTEC-ECX or ECD power supply. The cables feature a pre-installed waterproof snap-in gland for a secure connection to the top of the niche, and connectors to attach the LED strip. LIPROTEC-CW is rated for in-wall installation (no conduit required).

- Class 2 low voltage cable (CL2)
- CSA FT4 rated (80°C)
- UL listed in USA and Canada

Shower Accessories

Accessories are used to enhance tiled shower applications, providing shelving, splashguards at the entrances to curbless showers, support channels for glass walls, and wall finishing that eliminates the need to cut wedges of tile in KERDI-LINE applications.

Schluter®-SHELF-W

Schluter®-SHELF-W is a rectangular shelf designed for tiled walls. The shelf is made of either brushed stainless steel, or color-coated aluminum in a choice of 9 TRENDLINE colors. SHELF-W features a double anchoring leg for installation in tandem with tile. Matching KERDI-DRAIN and KERDI-LINE grates are also available.

Schluter®-SHELF-E

Schluter®-SHELF-E is a corner shelf designed for tiled walls. The shelf is made of either brushed stainless steel, or color-coated aluminum in a choice of 9 TRENDLINE colors. SHELF-E features 3/32" (2 mm) -thick anchoring tabs which allow for easy installation either in tandem with tile or as a retrofit application. Matching KERDI-DRAIN and KERDI-LINE grates are also available.

Schluter®-SHOWERPROFILE-S

The **Schluter®-SHOWERPROFILE-S** is a two-part profile with a tapered edge, designed to cover adjoining tile edges that become exposed as the shower floor slopes to accommodate drainage to the Schluter®-KERDI-LINE. The tapered profile features a visible surface of brushed stainless steel and a fleece fabric on the reverse for bonding with the tile adhesive. It is designed to be inserted into the U-shaped groove of the matching hard PVC support profile. The profile can be used for lateral transitions to the wall or the adjoining floor.

Note: Tapered profiles with higher support profiles in the heights 9/16" (15 mm), 23/32" (18 mm), and 7/8" (22 mm) are available upon request for greater tile thicknesses. Please contact Customer Service for price and delivery times.

Schluter®-SHOWERPROFILE-R

The **Schluter®-SHOWERPROFILE-R** is a two part wall transition profile made of brushed stainless steel for covering the exposed wall area where the floor slopes down to a perimeter linear drain. A fleece fabric is laminated on the reverse of the profile for bonding with the tile adhesive. The two-part design of Schluter®-SHOWERPROFILE-R can be seamlessly adjusted to any height between 29/32" (23 mm) and 1-25/32" (45 mm) (available in two versions). The profile is available in lengths of 39" (1 m) and 55" (1.4 m) and can be cut to the desired length.

SHOWER SYSTEM

Schluter®-SHOWERPROFILE-WS

The **Schluter®-SHOWERPROFILE-WS** is a two-part profile that forms a splashguard at the entrance of barrier-free showers. The anodized aluminum support profile is set in conjunction with the tile covering and can be combined with either a semi-circular lip made of rigid PVC or a collapsible upright lip made of transparent polyurethane. Both variants allow for wheelchair accessibility.

SHOWERPROFILE-WS + -WSC

Schluter®-SHOWERPROFILE-WSK

The **Schluter®-SHOWERPROFILE-WSK** is a two-part profile that forms a splashguard at the entrance of barrier-free showers. The anodized aluminum support profile is adhered to existing coverings and can be combined with either a semi-circular lip made of rigid PVC or a collapsible upright lip made of transparent polyurethane. Both variants allow for wheelchair accessibility.

Schluter®-DECO-SG

Schluter®-DECO-SG is a decorative profile featuring a 1/2" (12.5 mm) or 9/16" (15 mm) -wide channel that creates a shadow gap between tile courses or other wall covering. The profile may also be used as a support channel for glass panels. The 1/2" (12.5 mm) wide channel accommodates glass panels up to a thickness of 3/8" (10 mm), and the 9/16" (15 mm) wide channel accommodates glass panels up to a thickness of 1/2" (12.5 mm). DECO-SG features a trapezoid-perforated anchoring leg that is secured in the bond coat beneath the tile.

SHOWER SYSTEM

Schluter®-DECO-SGC

Schluter®-DECO-SGC is a decorative profile featuring a 1/2" (12.5 mm) or 9/16" (15 mm) wide channel used as a vertical support for glass panels in recessed showers that border on untiled walls that are plastered, creating a 90° angle between the glass partition and the untiled wall. The 1/2" (12.5 mm) wide channel accommodates glass panels up to a thickness of 3/8" (10 mm), and the 9/16" (15 mm) wide channel accommodates glass panels up to a thickness of 1/2" (12.5 mm). DECO-SGC features a trapezoid-perforated anchoring leg that is secured in the bond coat beneath the tile.

Schluter®-KERDI-FIX

Schluter®-KERDI-FIX is a single-component sealing and bonding compound with a silane-modified polymer base. It is odor-neutral, UV- and weather-resistant, and contains no solvents. KERDI-FIX is elastomeric and bonds well to most materials, such as wood, stone, concrete, metal, glass, and many plastics. KERDI-FIX is suitable for bonding and Schluter®-KERDI waterproofing membrane and Schluter®-KERDI-BAND to fixed building elements. KERDI-FIX is also suitable for use as a sealant.

Schluter®-BEKOTEC

Modular screed system for conventional & radiant-heated screeds

BEKOTEC is a modular screed system that produces permanent flooring assemblies that are free from internal stresses. The BEKOTEC system is based on a studded polystyrene screed panel. The studs confine curing stresses to small modules, which eliminates curling and allows the installation of continuous screed surfaces without any wire reinforcement or control joints. BEKOTEC is ideal for hydronic radiant heating applications, as it provides thermal insulation, allows for hydronic radiant tube application without fasteners, and reduces thermal mass to produce a responsive system that can operate at a low temperature range. The BEKOTEC system can also be used in conjunction with common sound insulation materials to produce a flooring system with excellent sound attenuation properties.

Schluter®-BEKOTEC and Schluter®-BEKOTEC-F

The **Schluter®-BEKOTEC** family of products are lightweight modular screed systems that are used to create continuous screed surfaces without control joints or reinforcement and can also accommodate hydronic radiant heating tubes $3/8"-5/8"$ ($10-16\text{ mm}$) O.D. They produce permanent flooring assemblies that are free from internal stresses by confining the shrinkage and curing stresses to smaller modules, which controls deformations such as curling and continuous cracks that are common in traditional screeds. Since they are floating systems, the assemblies can be customized to meet a range of heat and sound requirements. For use with ceramic tile, natural stone, or other surface coverings.

Schluter®-BEKOTEC is $1-3/8"$ (35 mm) -thick, and is made of expanded polystyrene.

Schluter®-BEKOTEC-F is $29/32"$ (23 mm) -thick, and is made of polystyrene foil.

Schluter® Setting Materials

Premium quality thin-set mortars & primers

Schluter Systems' thin-set mortars are specifically formulated for use with Schluter membranes and boards. Unmodified, modified, and rapid-setting versions are available. All are sag-resistant, smooth and creamy, easy to handle and spread, and suitable for use with ceramic, porcelain, and stone tile, including large and heavy tile, in conjunction with Schluter Systems' uncoupling and waterproofing membranes (e.g., DITRA, DITRA-HEAT, and KERDI), the Schluter Shower System, and KERDI-BOARD.

PRIMER-U is a ready-to-use universal primer and PRIMER-PS is specially formulated for use with peel and stick membranes.

Schluter®-SET

Schluter®-SET is a premium unmodified thin-set mortar specifically formulated for use with Schluter® membranes and boards. It is sag-resistant, smooth and creamy, and easy to handle and spread. Schluter®-SET is suitable for use with ceramic, porcelain, and stone tile, including large and heavy tile, in conjunction with Schluter®-Systems' uncoupling and waterproofing membranes (e.g., DITRA, DITRA-HEAT, and KERDI), the Schluter®-Shower System, and Schluter®-KERDI-BOARD.

Schluter®-SET meets the requirements of ANSI A118.1, and is available in both grey and white.

Schluter®-FAST-SET

Schluter®-FAST-SET is a specialized rapid-setting modified thin-set mortar specifically formulated for use with Schluter® membranes and boards. It is engineered for use both under and over all DITRA and KERDI products. FAST-SET is ready to grout in 4 hours for fast-track projects. It is sag-resistant, smooth and creamy, and easy to handle and spread. FAST-SET is suitable for use with ceramic, porcelain, and stone tile, including large and heavy tile, in conjunction with Schluter®-Systems' uncoupling and waterproofing membranes (e.g., DITRA, DITRA-HEAT, and KERDI), the Schluter®-Shower System, and Schluter®-KERDI-BOARD.

FAST-SET meets the requirements of ANSI A118.4TF, A118.11, and A118.15TF, and is available in both grey and white.

Schluter®-PRIMER-U

Schluter®-PRIMER-U is a ready-to-use, one-component, solvent-free, 100% acrylic, water-based, universal primer. It is used to enhance adhesion properties when applying Schluter thin-set mortars to difficult-to-bond-to surfaces such as gypsum underlayment, raised access panels, and existing tile. PRIMER-U is suitable for use with Schluter SET, ALL-SET, and FAST-SET thin-set mortars, as well as DITRA-PS, DITRA-HEAT-PS, and DITRA-HEAT-DUO-PS peel and stick membranes in interior applications where increased adhesion is required over various porous and non-porous substrates. PRIMER-U is freeze/thaw stable.

PRIMER-U was evaluated according to Rule 1168 from the South Coast Air Quality Management District and found to comply with the VOC requirements.

Suitable Substrates:

- Gypsum underlayment
- Concrete
- Existing tile
- Glass tile
- Plywood and OSB
- Terrazzo
- Steel
- VCT flooring
- Well-bonded flooring adhesive residue
- Latex paint
- Epoxy
- Aluminum
- Resin-backed mosaic tiles
- Asphalt-based cutback adhesive

TSM 115/1	15.95

Material Properties and Areas of Application

Schluter® profiles are resistant to most chemicals encountered in tiled environments. In special cases, the suitability of a proposed type of material must be verified based on the anticipated chemical, mechanical, and/or other stresses. Exceptions and special considerations are listed below.

Stainless steel profiles are roll-formed, resulting in a slightly different contour from those made of extruded brass or aluminum. Stainless steel can sustain high mechanical stresses and is particularly well suited for applications requiring resistance against chemicals and acids; for example in the food industry, breweries, dairies, commercial kitchens, and hospitals, as well as in residential applications. Typically, the profiles are formed using stainless steel 304 (1.4301 = V2A). For more severe chemical exposure, such as de-icing salts and chemicals used in swimming pools, we recommend the use of stainless steel 316 L (1.4404 = V4A), which offers even higher corrosion resistance than the 304. Even stainless steel cannot withstand all chemical exposures, such as hydrochloric acid, hydrofluoric acid or certain chlorine, chloride and brine concentrations.

Solid brass sustains high levels of mechanical stress; for example, as edge protection for outside wall corners or edges of surface coverings. Brass is resistant to most chemicals used in tiled environments. Solid brass that is

exposed to air will oxidize, resulting in a natural patina. If exposed to moisture or aggressive substances, heavy oxidation and spotting may occur.

Chrome-plated brass is especially suited for wall corners and finishing applications. It is ideal for matching chrome fixtures. Surface areas must be protected against abrasion or scratching.

Aluminum profiles must be tested to verify their suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline. Since aluminum is sensitive to alkaline substances, exposure to the alkali (depending on the concentration and duration of exposure) may result in corrosion (aluminum hydroxide formation). Therefore, it is important to remove mortar or grout residue from visible surfaces. In addition, ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water.

Anodized aluminum profiles feature an anodized layer that retains a uniform appearance during normal use. The surface, however, is susceptible to scratching and wear and may be damaged by grout or setting material. Therefore, these materials must be removed immediately. Otherwise, the description regarding aluminum applies.

Color-coated aluminum and **textured color-coated aluminum** are pretreated (chromated) aluminum that is color-coated with a polyurethane powder coat. The coating is color-stable, UV-resistant, and suitable for exterior use. Protect the profile against abrasion or scratching.

PVC profiles are made of pre-colored, rigid PVC that resists bending or scratching. The material is UV-resistant, though not permanently color-stable, in exterior applications. PVC profiles are not suited for corners or transitions subjected to heavy mechanical stresses (e.g., at step edges or floor transitions).

Note: Due to variations in raw materials and manufacturing, the exact color, shade, and/or texture of individual profiles and related components (e.g., corners, end caps, connectors, etc.) may vary. The customer must inspect the products upon delivery and notify Schluter in writing of any physical damage to the products or nonconformity with the purchase order or invoice.

Warranty Program Summary

All Schluter®-Systems products are covered under our warranty program. Products are warranted for the applicable term from the date of purchase only when the products are used and installed in accordance with the terms and conditions of the applicable Schluter®-Systems technical literature and industry standard guidelines that are not in conflict with the technical literature.

There are four different categories of warranties as follows:

Systems

Systems are application based and include a variety of products that form an integrated system. Systems are defined by installation handbooks.

- Schluter®-DITRA, DITRA-PS, and DITRA-XL uncoupling membranes
- Schluter®-DITRA-HEAT and DITRA-HEAT-PS electric floor warming system with integrated uncoupling technology
- Schluter®-Shower System

Lifetime

When you install Schluter®-DITRA/DITRA-PS/DITRA-XL, the Schluter®-Shower System, KERDI/KERDI-DS, DITRA-HEAT/DITRA-HEAT-DUO or DITRA-HEAT-PS/DITRA-HEAT-DUO-PS with one of our Schluter thin-set mortars, your installation may be eligible for limited lifetime warranty coverage.

Consolidated Products

Consolidated products are products with similar characteristics or functions that are grouped under a single warranty document. These product groups are defined by technical data sheets.

- Floor profiles
- Wall and countertop profiles
- Stair-nosing profiles
- Movement joints and cove-shaped profiles
- Resilient floor and wall covering profiles
- Schluter®-BEKOTEC modular screed panels
- Schluter®-KERDI-DRAIN, KERDI-DRAIN-A, KERDI-DRAIN-H, KERDI-DRAIN-F, KERDI-LINE, KERDI-LINE-A and KERDI-LINE-VARIO drains
- Schluter®-KERDI and KERDI-DS waterproofing membranes
- Schluter®-SET, ALL-SET and FAST-SET thin-set mortars

Individual Products

Individual products are those that do not fit into a current consolidated product group and therefore have a separate warranty document. These products are defined by technical data sheets.

- Schluter®-KERDI-BOARD building panels
- Schluter®-KERDI-BOARD-SNLT niches with LED lighting
- Schluter®-LIPROTEC drivers and cables
- Schluter®-REFLEECE removable fleece
- Schluter®-DITRA-HEAT-E thermostats
- Schluter®-KERDI-FIX adhesive/sealant
- Schluter®-PRIMER-U universal primer
- Schluter®-PRIMER-PS peel and stick primer
- Schluter®-DESIGN-NICHE aluminum niches
- Tools

CONDITIONS OF SALE

1. Terms and Conditions

These terms and conditions of sale (hereinafter referred to as the “Terms”) govern the sale of Products from Schluter Systems L.P. (“Schluter”) to Customer where such products are to be used within the United States and its territories. “Products” is defined to mean the products identified on the order confirmation or invoice, whichever is issued later by Schluter to Customer; and “Customer” is defined to mean the purchasing entity identified on such documents. The Terms herein, the terms and conditions contained on any order confirmation and/or invoice, and the terms and conditions contained in any applicable Credit Application, and/or supply agreement between Schluter and Customer, if any, represent the final and complete agreement of Schluter and Customer as to the sale and purchase of Products (the “Agreement”). In the event of any conflicting terms or conditions in the Agreement, the supply agreement, if any, shall be deemed to control; in the absence of a supply agreement, the order confirmation shall be deemed to control. Any and all different or additional terms than those contained in the Agreement are rejected unless expressly accepted in writing by an authorized representative of Schluter.

2. Price and Payment

Payment terms are net thirty (30) days from invoice date. No payments shall be subject to any setoffs, deductions or claims. For any amounts not paid by Customer as of the due date, Customer shall be liable to pay interest on the amount due at a rate of 1.5% per month from due date until date of payment in addition to the principal amount. Regardless of any statement appearing on a check or otherwise, Schluter’s acceptance of a payment in an amount less than that due shall in no way be an accord and satisfaction or prejudice Schluter’s rights and remedies to collect the full amount due. Prices do not include sales taxes or other charges levied by any governmental authority upon the sale, use or transportation of the Products, all of which shall be paid by Customer, including, without limitation, applicable customs duties and tariffs. Prices quoted in the Price List Catalog are subject to change without prior notice.

For the most current version of the Price List, please visit www.schluter.com.

3. Shipping/Title/Risk of Loss

Unless otherwise expressly set forth in writing by Schluter, all Products will be delivered Ex Works (as defined in Incoterms 2017 revision). Dates of shipments are estimated and not guaranteed. Title and risk of loss to Products shall transfer to Customer upon delivery in accordance with the applicable delivery terms. Any handling of the Products after transfer of risk of loss shall be at Customer’s sole risk.

4. Freight and Shipping Charges

Prices quoted in the Price List Catalog include ground freight (best way) charges within the continental USA, save and except for purchase orders under \$10,000 gross at retail, to which freight charges according to the table below will be added thereto.

Ground Freight (Best Way) Charges				
Orders up to \$500	\$500 to \$1,500	\$1,500 to \$3,000	\$3,000 to \$5,000	\$5,000 to \$10,000
\$65	\$85	\$125	\$200	\$300

Schluter offers express shipping to the continental USA; please see applicable table below for options and pricing. Next day and second day shipping is also applicable for Alaska and Hawaii. Please note that “shipping days” represent business days.

Express Handling Freight Charges				
Gross order value at retail	up to \$500	\$500 to \$1,500	\$1,500 to \$3,000	\$3,000 to \$5,000
Next day	\$125	\$220	\$300	\$400
Second day	\$100	\$180	\$275	\$350
Third day	\$85	\$140	\$200	\$260

Express orders greater than \$5,000 gross at retail are charged actual freight.

Certain items with oversized shipping dimensions are not eligible for express shipping. Additionally, certain items (such as 10' profiles) are not eligible for parcel shipping and are subject to an additional \$300 charge unless combined with an order exceeding \$10,000 gross at retail.

Freight charges including air express handling charges are subject to change without prior notice. Please note that we are unable to accommodate third party transport billing.

Accessories:

Accessories include corners and caps for profiles and Rema kits up to \$500 gross at retail:

Regular ground handling	Next-day express handling
\$30	\$50

Accessory orders over \$500 gross at retail are subject to standard shipping charges.

KERDI-BOARD panels:

- 1 to 5 full pallets: \$150/pallet
- 6+ full pallets: free shipping

THIN-SET pallets: minimum order equals 4 full pallets (1 pallet equals 56 bags per item number)

- 4 to 14 full pallets: \$500 freight charge per order
- 15 pallets: free shipping

Bundle offers for thin-set pallets with other products (i.e. DITRA and KERDI) are available and are eligible for free shipping. Please consult with a Schluter Sales Representative for more details.

3rd party shipping (drop shipping):

- Orders to a third party will incur a 10% handling fee.
- THIN-SET only orders to a third party will incur a \$200 handling fee.

5. Product Inspection; Non-conformity

Customer must inspect the Products upon delivery and notify Schluter in writing of any physical damage to the Products or nonconformity with the purchase order or invoice. **FAILURE TO INSPECT AND DELIVER WRITTEN NOTICE OF SUCH DAMAGE OR NONCONFORMITY WITHIN SUCH FORTY EIGHT (48) HOUR PERIOD SHALL CONSTITUTE IRREVOCABLE ACCEPTANCE OF THE DELIVERED PRODUCTS AND A WAIVER OF ANY DAMAGE OR NONCONFORMITY THAT WAS OR SHOULD HAVE BEEN DETECTED.** Any use of the Products or any portion thereof shall constitute irrevocable acceptance of such Products. As Customer’s sole remedy for any damaged or nonconforming Products of which Customer has delivered to Schluter timely notice of damaged or nonconforming Products, Schluter, at Schluter’s sole election, shall either: (a) replace the damaged or nonconforming Products, or (b) refund the price paid by Customer to Schluter for such damaged or nonconforming Products. In no event shall Schluter be liable for costs of procurement or substitute Products by Customer, or for injury or damage to business, or loss of profits, nor shall Schluter be liable for any incidental, special, indirect, or consequential damages. Any Product images are for illustrative purposes only; any differences between Product images and actual Product received shall not constitute nonconforming Product.

6. Cancellations

If Customer fails to make payment in accordance, or otherwise comply, with all terms of the Agreement, Schluter may, at its option (and in addition to all other remedies), cancel any unshipped portion of Customer’s order, without liability to Schluter, and Customer shall remain liable for all unpaid amounts. Subject only to Section 5 herein, orders, once accepted by Schluter, cannot be cancelled without Schluter’s prior written consent, which may be granted or withheld in Schluter’s sole and absolute discretion. In no event shall Schluter authorize the cancellation or deferment of shipment unless Schluter is indemnified against the loss resulting therefrom. Orders issued a tracking number are considered shipped; any cancellation or deferment will incur a 25% restocking fee.

7. Returns

Schluter shall not accept any returns unless it specifically authorizes such in writing, which may be granted or withheld in Schluter's sole and absolute discretion. Under no circumstances shall Schluter accept any returned Products after thirty (30) days from such Products' invoice date. Any authorized returns must be in resellable condition subject to inspection by Schluter prior to acceptance of same. All authorized returns shall incur a handling charge of 25%.

8. Special Orders

Customer will defend, at its own expense, any suit which may be brought against Schluter by reason of the manufacture or sale of special or non-stock Products made to Customer's specifications, including any third party proceedings. In the case of cancellation of orders of special or non-stock Products, Customer's cancellation may be conditioned upon Customer's payment in full of the price of finished Products. Schluter shall not accept any returns of special or non-stock Products.

9. Warranty and Damages Disclaimer

a. Warranty The Products are covered by product-specific warranties, available at www.schluter.com or Schluter's Warranties Page. The warranty that applies is the applicable warranty in effect for the Products as of the date of the proforma invoice, or if no proforma invoice, as of the date of the order acknowledgement for the Products (the "Written Warranty").

b. Disclaimer THE WRITTEN WARRANTY IS THE ONLY WARRANTY APPLICABLE TO THE PRODUCTS AND EXCLUDES ALL OTHER WARRANTIES, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ANY IMPLIED WARRANTIES OTHERWISE ARISING FROM A COURSE OF DEALING OR USAGE OF TRADE, EXCEPT WHERE PURCHASE OF THE PRODUCTS IS SUBJECT TO CONSUMER PRODUCT WARRANTY LAWS, IN WHICH INSTANCES ANY APPLICABLE IMPLIED WARRANTIES ARE LIMITED TO THE PERIOD OF THE APPLICABLE WRITTEN WARRANTY, OR SUCH SHORTER PERIOD AS PERMITTED OR REQUIRED UNDER APPLICABLE LAW. IN NO EVENT WILL SCHLUTER BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED, WHETHER FOR BREACH OF CONTRACT, BREACH OF WARRANTY, TERMINATION, NEGLIGENCE, OR OTHERWISE, EVEN IF SCHLUTER SHALL HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Recommendations, advice, representations, warranties, commitments or agreements that are inconsistent with the foregoing disclaimer shall not be binding on Schluter unless in a writing signed by an authorized representative of Schluter. Schluter's only obligation is to provide the Products in the quantities ordered by Customer (which order is accepted by Schluter) without regard to the Products' appropriateness to Customer's application. Customer represents and warrants that Customer is not a "consumer" as defined by any applicable usury or consumer protection laws.

10. Delay/Force Majeure

Delay in delivery or nondelivery by Schluter shall not be a breach or default by Schluter if performance is delayed or made impracticable or impossible by the occurrence of any one or more of the following: (a) fire, flood, or other casualty, (b) war, riot, embargo, governmental regulation or martial law, (c) inability to obtain necessary materials from usual sources of supply, (d) shortage of transportation or delays in transit, (e) strike or other labor issue, and (f) other conditions not reasonably within Schluter's control, whether or not of a kind mentioned herein.

11. Choice of Law

For sales made in the United States or its territories, the Agreement (including, without limitation, these Terms) shall be governed by the State of New York, without regard for its choice of law provisions.

12. Arbitration

a. Any controversy, claim or dispute arising out of or in connection with the Agreement shall be settled by final and binding arbitration administered by the American Arbitration Association in accordance with its Commercial Arbitration Rules in Plattsburgh, Clinton County, state of New York and judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction. The arbitration shall be heard by a single arbitrator appointed in accordance with the Commercial Arbitration Rules, and shall be conducted in English.

b. If a controversy or claim relates to or is the subject of a mechanic's or construction lien, Schluter may proceed in accordance with applicable law to preserve and enforce its lien rights. TO THE FULLEST EXTENT PERMITTED BY LAW, NOTWITHSTANDING ANY ARBITRATION RULE OR PROCEDURE, (A) NO CONTROVERSY OR CLAIM ARISING OUT OF OR RELATING TO THE AGREEMENT SHALL BE CONSOLIDATED OR JOINED WITH ANY OTHER PERSON'S CLAIM AND NO CLASS ACTION OR REPRESENTATIVE ACTIONS SHALL BE PERMITTED UNDER THE AGREEMENT, AND (B) IF ANY CLASS OR REPRESENTATIVE ACTION CANNOT BE WAIVED UNDER APPLICABLE LAW, THE PARTIES AGREE THAT SUCH ACTION SHALL BE ARBITRATED.

13. Miscellaneous

No amendment, alteration, variation, deletion, addition, and/or cancellation of these Terms made by Customer shall be of any force or effect unless reduced to writing and signed by a director of Schluter. If any clause, subclause, or other provision of these Terms is invalid under any statute or rule of law, such provision, to that extent only, shall be deemed to be omitted without affecting the validity of the remainder of the Terms. Customer shall pay to Schluter all costs of collection, including, without limitation, reasonable attorneys' fees, incurred by Schluter in enforcing the Agreement, including, without limitation, collecting any money due from Customer and enforcing Schluter's lien rights. No waiver by Schluter of any term or any obligation of Customer shall constitute a waiver of any other term or obligation. Customer shall not assign or transfer its rights or obligations under the Agreement without the prior written consent of Schluter. All of Customer's representations, warranties and indemnities under the Agreement shall survive the consummation of or the termination or cancellation of any purchase and sale of Products. Which party prepared the Agreement shall have no bearing on the construction or interpretation of the Agreement. Buyer will defend, at its own expense, any suit or legal proceeding, including any third party proceedings, which may be brought against Schluter by reason of the manufacture or sale of any special product(s) made to Buyer's specifications. These Terms supersede all prior versions of Schluter's Conditions of Sale. Schluter reserves the right in its sole discretion to amend these Terms from time to time and any such amended terms and conditions shall be binding on Customer. For the most current version of the Terms, please visit schluter.com/terms.
