

Installation Systems

for ceramic and stone tile

FLOORS

Protect tile edges from chipping

Ceramic and stone tiles are rigid by nature. Consequently, exposed edges are prone to cracking or chipping. Floor profiles allow you to protect these edges while creating a clean transition to adjacent floor coverings. All profiles are available in a wide variety of metal finishes.

WALLS & COUNTERTOPS

Finishing tiled edges

Ceramic and stone tiles need protection at outside corners, but it can often be difficult to find matching ceramic trim pieces. Schluter®-Systems profiles come in a variety of colors, finishes, and shapes to protect outside corners and create a clean look on walls and countertops.

SHOWER GLASS PROFILES

Seamless installation of glass shower panels

Showers with glass partitions are luxurious, bright, and in-demand. They are the perfect option for the bathroom where you can create distinct spaces, but still allow natural light to flow from one space to the other, creating the sense of a larger, more spacious area. Schluter®-DECO-SG and DECO-SGC provide secure support for glass partitions and feature a minimal reveal for a clean, seamless look.

Schluter®-DECO-SG

SCHLUTER®-TRENDLINE

Profile colors to match today's tile trends

The TRENDLINE series of profiles features a line of colors designed to go with the latest trends in tile. Today's tile plays off the look of wood and concrete and comes in a myriad of greige and metallic colors. The TRENDLINE series of profiles provides the perfect match.

Many RONDEC and QUADREC profiles in TRENDLINE finishes are also available in 10-foot lengths.

WATERPROOFING SYSTEMS

The complete waterproofing system for tiled showers and bathtub surrounds

What's behind your tile matters! Bathrooms are wet areas that are constantly exposed to water. Schluter®-Systems combines an integrated family of products to form a bonded, watertight assembly to prevent mold, leaks, and eliminate potential failures due to water and vapor penetration.

UNCOUPLING MEMBRANES

A must for every tiled floor

DITRA and DITRA-HEAT are uncoupling membranes that are placed between your tile and the substrate of your floor. These membranes allow independent movement to occur in your floor, eliminating the transfer of stresses from the substrate to the tiled surface which most often results in cracked tiles.

Prefer a cozy, warm floor? Choose DITRA-HEAT with heating cables and thermostat!

DRAINS

Schluter®-KERDI-DRAIN

KERDI-DRAIN is a floor drain with an integrated bonding flange that provides a large contact area for a secure connection to the KERDI waterproofing membrane at the top of the shower assembly. Choose the drain grate color, finish, and design to match your tile or bathroom hardware, or opt for the tileable drain grate that blends in seamlessly with your shower floor.

Schluter®-KERDI-LINE

KERDI-LINE is a low-profile linear drain specifically designed for bonded waterproof assemblies. With linear drains, the entire floor slopes gently towards the drain. It's also the perfect drainage option for curbless showers and allows you to run your tile from your floor right into your shower. Several colors, finishes, and designs are available, plus a tileable grate option for a more discreet look.

Schluter®-KERDI-LINE-VARIO

KERDI-LINE-VARIO is a variable length linear drain that can be cut to size on-site, allowing it to be customizable to fit various shower sizes. Like KERDI-LINE it has a secure, waterproof connection with the Schluter® Shower System, but features a bit of a slimmer, sleeker look. VARIO is suitable for placement along the wall or in the center of the shower, and for a single standard shower head.

SCHLUTER®-DILEX

Eliminate messy caulking

DILEX profiles are the perfect alternative to caulking, creating clean, straight, uniform lines between adjacent walls, or connections between the wall and tub surround. These areas which are typically finished with caulking can be penetrated by water which can lead to cracking, mold spots, and the eventual need to re-caulk. DILEX profiles create maintenance-free, long-lasting, professional installations.
