

We're hiring!

IT Security Administrator

Montreal, QC

Who you are...

The IT Security Administrator is responsible for planning, directing, and coordinating the administration and installation of security controls, as well as monitoring to ensure the secure operation of the organization. The Security Administrator, with their impeccable attention to detail and problem-solving skills, develops, configures, maintains, supports, and optimizes all new and existing security applications like SIEM, PAM, AV, and IDM, along with threat analysis tools and authentication.

What you'll do...

- Work with the Infrastructure security engineer team to implement short- and long-term strategic plans to meet the existing and future security requirements
- Implement and enforce policies, guideline, procedures, and associated training plans for security controls, administration, and appropriate use
- Implement and enforce policies, guideline for security asset management, including maintenance of patching, life cycle management
- Administration of all security applications, including Anti-Virus, Vulnerability Scanner, Awareness training platform, mobile threat prevention, etc
- IT Change Management

We're looking for...

- BA in IT, Business Technology, or other related fields
- Basic ITIL or Agile certification a plus
- 3 to 5 years of experience in a related position
- Bilingual, both oral and written
- Experience managing and working with the following:
 - MDM solution
 - PAM Solution
 - Antivirus Management
 - Patch Management
